Fiscal Year Ending June 30, 1953

---

### ADMINISTRATIVE DEPARTMENT

Edmund L. Leckert, M.D., Director  
Alvin J. Fray, M.D., Assistant Clinical Director  
J. T. Jackson, M.D., Assistant Clinical Director  
Adolph A. Flores, M.D., Assistant Clinical Director  
A. P. Richard, II, Administrative Assistant to Director  
Leo A. Millet, Secretary-Treasurer

---

### PURCHASING DEPARTMENT

Henry F. Weihmann, Purchasing Agent

---

### PERSONNEL DEPARTMENT

Louis A. Davila, Director

---

### DEPARTMENT OF PATHOLOGY

Emma S. Moss, M.D., F.A.S.C.P., F.A.C.P., Director  
Certified American Board of Pathology: Pathologic  
Anatomy and Clinical Pathology  
George E. Fasting, M.D., Pathologist  
Clarence H. Denser, M.D., Assistant Pathologist  
Donald G. Kilgore, Jr., M.D., Assistant Pathologist  
Marion W. Hood, Ph.D., Microbiologist

---

### DEPARTMENT OF DIAGNOSTIC ROENTGENOLOGY AND THERAPEUTIC RADIOLOGY

Manuel Garcia, M.D., Radiologist  
J. V. Schlosser, M.D., Assistant Radiologist  
F. F. Millsaps, M.D., Assistant Radiologist

---

### ELECTROENCEPHALOGRAPH DEPARTMENT

E. Tharp Posey, M.D., Director

---

### HEART STATION—ELECTROCARDIOGRAPH LABORATORY

Richard Ashman, Ph.D., Director  
Louis Levy III, M.D., Assistant Director

---

### PHYSICAL THERAPY DEPARTMENT

Nathan H. Polmer, M.D., Medical Director  
Marion B. Stewart, B.S., Reg. Physical Therapist, Supervisor

## DEPARTMENTAL STAFFS—Continued

---

### DEPARTMENT OF ANESTHESIA

John Adriani, M.D., Director

---

### OPERATING, ACCIDENT AND CYSTOSCOPIC ROOMS

Sister Paula, Director

---

### CONTAGIOUS UNIT

Sue Fabregas, Supervisor

---

### POLIOMYELITIS CENTER

Dorothea Armbruster, R.N., Supervisor

---

### DENTISTRY

The Senior Dental Students of Loyola University of New Orleans, Louisiana, School of Dentistry, served as Externs in Denistry for periods listed

#### June 22, 1952 to July 12, 1952

Francis Ralph Dauterive  
(Also from 3/30/53 to 4/6/53 and  
from 5/3/53 to 5/17/53)

James W. McCurdy  
(Also from 5/3/53 to 5/30/53)

C. W. Murret  
(Also from 8/3/52 to 8/23/52 and  
from 5/3/53 to 5/30/53)

#### July 13, 1952 to August 2, 1952

E. H. Ecuyer  
W. J. Ferrand  
F. W. Huete

#### August 3, 1952 to August 23, 1952

V. P. Ciolino  
M. P. Ardoin

#### August 24, 1952 to September 13, 1952

C. S. Borum  
V. P. Bruno  
D. O. Campbell

#### September 14, 1952 to October 4, 1952

J. C. Cush  
R. A. Englerth  
J. D. Randolph

#### October 5, 1952 to October 25, 1952

E. A. Ewen  
(Also from 5/3/53 to 5/30/53)  
W. M. Gilmore  
R. D. Graham

#### October 26, 1952 to November 15, 1952

G. E. Walker  
J. J. Hebert  
N. F. Guichet

#### November 16, 1952 to December 6, 1952

F. W. Hoyle  
J. T. Janus  
D. I. Jobe

#### December 7, 1952 to December 27, 1952

H. G. Magee  
J. E. Little, Jr.  
C. H. Lee

## EXTERN STAFF—Continued

---

**December 28, 1952 to January 17, 1953**

H. B. McWhorter  
O. J. Mollere  
W. J. Moret, Jr.

**January 18, 1953 to February 7, 1953**

H. D. Mullis  
F. Piazza  
J. A. Pitman

**February 8, 1953 to February 28, 1953**

J. R. Rivera  
D. M. Quinn, Jr.  
R. L. Pourciau

**March 1, 1953 to March 21, 1953**

J. C. Silvestri, Jr.  
J. B. Weyman  
D. E. Schange

**March 22, 1953 to April 11, 1953**

A. J. Wilson  
(Also from 5/18/53 to 5/30/53)  
A. L. Windham  
W. T. Wood, Jr.

**April 12, 1953 to May 2, 1953**

M. H. Baker  
A. J. Adams, Jr.  
B. C. Baugh

**May 31, 1953 to June 20, 1953**

G. P. Aycock  
W. D. McGraw  
H. L. Beebe

**June 21, 1953 to July 11, 1953**

J. R. Berney  
M. Boutwell  
J. M. Buatt

# CHARITY HOSPITAL VISITING STAFF

July 1, 1952 to June 30, 1953

## TULANE UNIT

### Medicine and Medical Specialties

#### GENERAL MEDICINE

##### Consultants

O. W. Bethea, M.D.

L. J. Dubos, M.D.

S. C. Jamison, M.D.

##### Senior Visiting Physicians

R. Bernard, M.D.

G. E. Burch, M.D.

M. Campagna, M.D.

\*\*J. S. D'Antoni, M.D.

G. A. Goldsmith, M.D.

\*\*S. Jacobs, M.D.

P. H. Jones, M.D.

P. L. Querens, M.D.

I. L. Robbins, M.D.

W. A. Sodeman, M.D.

C. J. Tripoli, M.D.

R. H. Turner, M.D.

##### Visiting Physicians

W. R. Arrowsmith, M.D.

R. Birchall, M.D.

J. K. Bradford, M.D.

D. C. Browne, M.D.

L. R. Cabiran, M.D.

A. Calix, M.D.

W. S. Culpepper, M.D.

W. D. Davis, M.D.

B. J. DeLaureal, M.D.

V. J. Derbes, M.D.

E. B. Ferguson, M.D.

T. Findley, M.D.

J. P. Fox, M.D.

N. Goldstein, M.D.

D. L. Gordon, M.D.

H. B. Greenberg, M.D.

H. Horack, M.D.

C. A. Jones, M.D.

C. C. Joseph, M.D.

R. C. Jung, M.D.

E. D. Kilbourne, M.D.

H. A. Klein, M.D.

N. B. Kurnick, M.D.

A. J. Leonard, M.D.

W. D. Locke, M.D.

W. D. Love, M.D.

J. A. Magne, M.D.

E. de S. Matthews, M.D.

P. F. Murison, M.D.

C. S. Nadler, M.D.

J. G. Parker, M.D.

F. A. Pou, M.D.

C. T. Ray, M.D.

F. L. Reuter, M.D.

M. Saunders, M.D.

J. E. Schenthal, M.D.

A. Segaloff, M.D.

J. R. Snaveley, M.D.

C. C. Sprague, M.D.

S. A. Threefoot, M.D.

W. J. Trautman, M.D.

T. F. Treuting, M.D.

W. G. Unglaub, M.D.

\*\*A. J. Walker, M.D.

†N. K. Weaver, M.D.

T. E. Weiss, M.D.

L. S. Wu, M.D.

M. Ziskind, M.D.

##### Assistant Visiting Physicians

\*D. M. Adams, M.D.

J. A. Abildskov, M.D.

†J. E. Bechtold, M.D.

C. Y. Bowers, M.D.

L. Bunyaman, M.D.

M. Burris, M.D.

\*R. Carabasi, M.D.

M. F. Johnson, M.D.

R. C. Kelleher, M.D.

M. J. Ledoux, M.D.

H. P. McGrade, M.D.

A. Prieto, M.D.

R. B. Romney, M.D.

F. M. Selfridge, M.D.

\* Resigned

\*\* Leave of Absence

† Military Leave

## VISITING STAFF TULANE UNIT (Continued)

### GENERAL MEDICINE—(Continued)

†R. L. Coppedge, M.D.  
L. C. Eyrich, M.D.  
L. G. Horan, M.D.  
L. Hutchinson, M.D.

\*C. A. Serbst, M.D.  
W. L. Treuting, M.D.  
D. D. Vaughan, M.D.  
H. J. Weisler, M.D.  
G. E. Welch, M.D.

### Scientists

P. C. Beaver, Ph.D.  
Ana E. Carrera, M.D.  
M. H. Hack, Ph.D.  
P. Laksanaphuk, M.D.

O. Neal Miller, Ph.D.  
A. Miller, Ph.D.  
M. F. Shaffer, Ph.D.  
H. L. Rosenthal, Ph.D.

### DERMATOLOGY AND SYPHILIOLOGY

#### Senior Visiting Physician

M. T. VanStuddiford, M.D. (Deceased)

#### Visiting Physicians

A. N. Alvarado, M.D.  
A. J. Italiano, M.D.

L. D. McLean, M.D.  
W. K. Reed, M.D.

R. Ross, M.D.

#### Assistant Visiting Physician

F. C. Grieshaber, M.D.

### NEUROLOGY AND PSYCHIATRY

#### Consultant

W. J. Otis, M.D.

#### Senior Visiting Physician

R. G. Heath, M.D.

#### Visiting Physicians

C. Adatto, M.D.  
J. W. Bick, M.D.  
F. W. Brewer, M.D.  
A. W. Epstein, M.D.  
D. A. Freedman, M.D.  
R. C. Lancaster, M.D.  
H. I. Lief, M.D.  
I. M. Marcus, M.D.  
H. H. Mills, M.D.

R. R. Monroe, M.D.  
E. C. Norman, M.D.  
H. T. Posey, M.D.  
N. H. Rucker, M.D.  
M. Sabshin, M.D.  
J. Schroff, M.D.  
T. L. L. Soniat, M.D.  
R. L. Stone, M.D.  
G. L. Usdin, M.D.

#### Assistant Visiting Physicians

L. M. Boudreaux, M.D.  
G. W. Burke, M.D.  
L. H. DeGeneres, M.D.  
M. L. Enelow, M.D.  
J. A. Fisher, M.D.  
R. G. Head, M.D.  
F. R. Hine, M.D.

G. Jacobson, M.D.  
F. T. Lossy, M.D.  
C. Midlo, M.D.  
†M. D. Shelton, M.D.  
W. R. Sorum, M.D.  
E. Snow, M.D.  
P. J. Spoto, M.D.

\* Resigned

† Military Leave

## VISITING STAFF TULANE UNIT (Continued)

### Scientists

C. D. Hendley, Ph.D.  
R. Hodes, Ph.D.  
H. E. King, Ph.D.

B. E. Leach, Ph.D.  
\*T. D. Price, Ph.D.  
K. M. Young, Ph.D.

### PEDIATRICS

#### Consultant

M. Loeber, M.D.

#### Senior Visiting Physicians

R. E. de la Houssaye, M.D.    R. V. Platou, M.D.    G. R. Williamson, M.D.

#### Visiting Physicians

J. Graubarth, M.D.  
C. G. Grulee, M.D.  
E. L. Levert, M.D.

E. F. Naef, M.D.  
J. D. Russ, M.D.  
C. H. Snyder, M.D.

#### Assistant Visiting Physicians

E. L. Allen, M.D.  
R. Bost, M.D.  
\*C. F. Clarke, M.D.  
\*J. S. Clarke, M.D.  
Mary O. Cruise, M.D.  
J. Dent, M.D. (Transferred to  
Pathology)  
†J. A. Diaz, M.D.  
G. J. Fruthaler, Jr., M.D.  
\*H. N. Graubarth, M.D.  
F. M. Harris, M.D.  
J. M. Horan, M.D.  
\*F. H. Howard, M.D.

E. MacKenzie, M.D.  
\*J. Marstrander, M.D.  
H. P. Marks, M.D.  
J. R. Mitchell, M.D.  
Garth G. Myers, M.D.  
\*\*J. R. Powers, M.D.  
H. G. Simon, M.D.  
M. H. D. Smith, M.D.  
†D. Stowens, M.D.  
C. D. Talley, M.D.  
\*L. J. Supple, M.D.  
\*\*D. VanGelder, M.D.  
R. P. Veith, M.D.

C. F. Wasserman, M.D.

#### Scientist

H. W. Klopfer, Ph.D.

### PATHOLOGY

#### Consultant

W. H. Harris, Sr., M.D.

#### Senior Visiting Pathologist

C. E. Dunlap, M.D.

#### Visiting Pathologists

G. M. Carrera, M.D.  
†W. H. Clark, Jr., M.D.  
E. Farber, M.D.

W. H. Harris, Jr., M.D.  
W. H. Sternberg, M.D.  
J. Ziskind, M.D.

#### Assistant Visiting Pathologists

C. C. Carleton, M.D.

J. H. Dent, M.D.

W. W. Forest, M.D.

#### Scientist

\*Z. de Aranjó Andrade, M.D.

\* Resigned

\*\* Leave of Absence

† Military Leave

## VISITING STAFF TULANE UNIT (Continued)

### SURGERY AND SURGICAL SPECIALTIES

#### SURGERY

##### Consultants

W. P. Bradburn, M.D.

O.C. Cassegrain, M.D.

R. Matas, M.D.

##### Senior Visiting Surgeons

E. Bloch, M.D.

F. F. Boyce, M.D.

D. H. Echols, M.D.

(Neurosurgery)

I. M. Gage, M.D.

H. R. Kahle, M.D.

E. W. A. Ochsner, M.D.

Neal Owens, M.D. (Plastic Surgery)

R. M. Penick, M.D.

A. H. Storeck, M.D.

R. W. Vicent, M.D.

(Plastic Surgery)

##### Visiting Surgeons

†J. E. Blalock, M.D.

E. J. Cerise, M.D.

L. S. Charbonnet, M.D.

A. C. Davidson, M.D.

†P. T. DeCamp, M.D.

P. H. Hanley, M.D.

M. O. Hines, M.D.

H. D. Kirgis, M.D.

E. T. Krementz, M. D.

F. T. Kurzweg, M.D.

\*R. M. Landry, M.D.

R. C. Llewellyn, M.D.

(Neurosurgery)

R. C. Lynch, M.D.

M. L. Michel, M.D.

J. M. Mosely, M.D.

J. W. Overstreet, M.D.

W. C. Quinn, M.D.

C. J. Ray, M.D.

\*R. A. G. Ricketson, M.D.

(Plastic Surgery)

C. R. Walter, M.D.

##### Assistant Visiting Surgeons

C. C. Abbott, M.D.

G. A. Balla, M.D.

G. W. Hagerman, M.D.

## JOINT REPORT OF THE VICE-PRESIDENT AND THE DIRECTOR

July 1, 1953

The Honorable Robert F. Kennon  
Governor of the State of Louisiana  
Baton Rouge, Louisiana

Dear Governor Kennon:

The Vice-President of the Board of Administrators and the Director of the Charity Hospital of Louisiana at New Orleans submit the following report of the activities of the hospital covering the period from July 1, 1952 to June 30, 1953, inclusive.

The following members continued their services on the Board of Administrators during the past year:

Dr. E. L. Leckert  
Mr. George Van Kuren  
Dr. Felix A. Planche  
Mr. William E. Schulingkamp  
Dr. N. J. Tessitore  
Dr. P. H. Jones  
Dr. Edmund Connely  
Mr. A. L. Wetterhall  
Mr. Thomas C. Fischer  
Dr. J. O. Weilbaeher, Jr.  
Mr. L. A. Millet, Secretary-Treasurer  
Mr. William August Worner continued to serve as Vice-President.

The Members serving on the standing Committees were as follows:

Finance Committee—  
Dr. Felix A. Planche, Chairman  
Mr. George Van Kuren  
Mr. W. E. Schulingkamp  
Mr. Thomas C. Fischer  
Mr. A. L. Wetterhall  
Medical Committee—  
Dr. J. O. Weilbaeher, Jr., Chairman  
Dr. P. H. Jones  
Dr. Edmund Connely  
Dr. Felix A. Planche  
Dr. N. J. Tessitore  
House Committee—  
Mr. George Van Kuren, Chairman  
Dr. P. H. Jones  
Dr. Edmund Connely  
Mr. Thomas C. Fischer  
Mr. A. L. Wetterhall

Dr. Jack T. Jackson was appointed as Assistant Clinical Director in Surgery on July 1, 1952.

Doctors Adolph A. Flores, Jr., and Alvin J. Fray were appointed as Assistant Clinical Directors in Medicine on October 1, 1952.

Dr. E. L. Leckert was appointed as Director of the Hospital on July 23, 1952.

Mr. A. P. Richard, II was appointed as Institutional Business Manager on November 1, 1952.

## HOSPITAL BUILDINGS

**Main Building**—This building contains a total of 2,078 beds devoted to patients' care—divided as follows: Medicine, Surgery, Premature Infant Section, Pediatrics, Gynecology, Radium, Orthopedics, Urology, Eye, Ear, Nose and Throat, Dermatology, Obstetrics, Nurseries, Dental Surgery, Psychiatry and Unassigned beds.

The other departments are as follows: Operating Rooms (including two surgical amphitheaters), Delivery Rooms (including Obstetrical Operating Rooms), Pathology Department, Anesthesia Department, Diagnostic and Therapeutic X-Ray Department, Cardiology Department, Physical Therapy, Medical Records Library, Electroencephalographic Department, Social Service Department; Operating the following clinics: General Surgery, Plastic Surgery, Thoracic Surgery, Neuro-Surgery, Vascular Diseases, Tumor, Fracture, Orthopedics, Obsteric, Post-Partial, Gynecology, Male and Female Urology, Special Therapy, Obstetrical Special Therapy, Glaucoma, Ophthalmological Medicine, Refraction, Ear, Nose and Throat, Dental Surgery, Dental (Caries), Male and Female Medicine, Metabolic, Endocrine, Tropical Medicine, Cardiac, Neurology, Psychiatry, Pediatric and Immunization, Infant Feeding and Infant Immunization, Pediatric Cardiac, Pediatric Diabetic, Premature, Procto-Medicine, Procto-Surgery, Epilepsy, Spinal, Scraping, Hematology, Dermatology, Allergy, Clinic Cystoscopy, Pasteur, Alcoholic Rehabilitation and Diagnostic Pain Clinic.

This building also contains a non-sectarian Chapel, Catholic Chapel, Dietary Department (with dining rooms for doctors, nurses and employees), Visitors' Food Service for White and Colored, Bakery Shop, Linen and Sewing Rooms, Auditorium, Post Office, Hospital Laundry, Hospital Library, Occupational Therapy, Business Offices and Administrative Offices covering every phase of the administration of the hospital.

The 13th, 14th, 16th, 17th and 18th floors of the building are the living quarters of the intern and resident physicians attached to the hospital. The 19th floor is devoted to recreation rooms for doctors assigned to the Institution.

**Isolation Building**—The Isolation Unit, which was completely remodeled, was formally opened October 16, 1952, with Mrs. S. Fabregas, Nursing Supervisor, and the Director cutting the ribbon.

All units of the renovated building contain wall outlets for piped oxygen to replace the time consuming practice of rolling a tank of oxygen to the patients bedside. The pediatric unit has been divided into plate glass enclosed cubicles enabling the nurse to see from one unit to the next. Painting and other improvements give the old building the appearance of a more modern structure. Lighting, ventilation and elevator service have all been greatly improved. These improvements, particularly the inclusion of a small operating room for treachotomies, has enabled the rendering of much more efficient service and doubtless prevent the loss of several lives.

**Dibert Building**—Extensive alterations to the basement of the Dibert Building were in the planning stage which will completely modernize the kitchen, refrigeration system, dressing rooms, clothing storage and incinerator facilities.

The efficacy of providing the building with metal awnings was being explored. Plans to provide additional electrical current were underway which would permit the installation of electric ice making machines and enable the hospital to remove the old-fashioned cumbersome ice-chests. It is expected that the majority of this work will be completed before the middle of the next calendar year.

## DEPARTMENTAL UNITS

**Department of Medical and Surgical Care**—The Department of Medical and Surgical Care performed services to the large number of patients shown in figures elsewhere. The Resident Staff has come up to nearly its quota, but some services still lack enough applicants to keep them functioning at the most efficient level.

The Intern Corps had a further decrease in its number in line with nationwide shortages. Studies are being made in an attempt to increase the number of intern applicants. This year, a \$15.00 increase was given to Interns and Residents in accordance with that policy. Admitting Physicians are paid \$25.00 extra monthly during their period of service in the Admitting Rooms. On some days these physicians interview as many as 100 patients each.

The military toll has added the complexities of filling our residency quota. Unfortunately, service to Charity Hospital at the Resident level is not considered essential by the military authorities.

Despite the overall load of work, Charity Hospital physicians have turned in a splendid record of medical performance for the past fiscal year.

**Radiology Department**—During the past year, 149,798 patients were examined and 298,780 films processed. Fluoroscopies numbered 8,903.

In the Therapeutic Division, 57,088 patients were treated by Roentgen Therapy and 324 by Radium.

**Pathology Department**—707,157 laboratory tests were made during the past year and 1,713 autopsies performed.

The Pathology Department conducts a School of Medical Technology for the teaching of medical laboratory technicians. During the past year, 18 students were admitted, 24 completed their training, and 16 are still in training in this approved school.

**Rehabilitation Unit**—A ten bed ward was opened as an alcoholic rehabilitation unit, these patients received special medical treatment; and reports to date are very favorable, in conjunction with this unit. There is an out-patient clinic which is held weekly, and patients are advised the type of treatment they may continue at home.

**Dietary Department**—The Dietary Department has completed another successful year, the high standards of food service to patients and personnel have been maintained, and the training program of Dietitians has met the requirements of the American Dietetic Association. 16 dietetic interns were graduated, two of whom accepted positions on the staff.

1,418,830 meals were served to personnel, 2,353,812 to patients and 802,353 special diets prepared. In addition, 77,225 infant formulae were prepared and served throughout the past year.

**Nurses**—During the past year, 308 Professional Nurses and 680 Practical Nurses, Nurses' Aides and Attendants were employed.

Within the last year, 66 students were graduated from the School of Nursing, of which 46% were subsequently employed at Charity Hospital. The school has admitted 126 students from a total of 238 applicants.

A total of 42 students have enrolled in the School of Practical Nursing and 19 students will graduate in September, at which time a new group

of students will be admitted. In December 1952, the School was surveyed by the National Association for Practical Nurse Education. The Accrediting Committee commended the many constructive changes and excellent progress made since their last visit. Full accreditation was granted by the National Organization in January 1953.

**Operating Rooms**—13,151 major operations and 395 casearian sections were performed.

**Out-Patient Clinics**—During the past year, 295,853 patients were treated in the Admitting Rooms of this hospital, 88,955 patients were seen in its Accident Rooms, and 501,499 visits were made by 86,891 patients to the Clinics. From these three departments, 65,239 patients were admitted to hospital wards, spending a total of 847,719 days in the hospital. Of the patients admitted to the hospital, 20,305 were white and 44,934 negro.

**Blood Bank—Anesthesia—Gas Therapy**—These Departments are under the efficient supervision of Dr. John Adriani.

The number of units of blood released for transfusions for the fiscal year were 19,808. The number of donors processed were 20,505. An additional technician was employed due to the increased demands upon the laboratory for service.

The department of Anesthesia administers anesthetics to all Surgical cases subjected to operations in the hospital. In addition, it operated a clinic in which nerves are blocked for the specific purpose of controlling otherwise intractable pain. Equipped to administer all types of anesthetics, this department has rendered invaluable service to the patients and hospital.

A total of 15,913 anesthetics was administered approximately 75% of which were general consisting of cyclopropane, ethylene ether, vinyl ether—ether, nitrous oxide—pentothal. Spinal anesthesia, nerve blocks and local comprised the remaining cases.

The Gas Therapy Department conducts the administration of oxygen and other gaseous therapeutic agents in the hospital. In addition, this department is responsible for the maintenance of all equipment necessary for the conduction of inhalation therapy.

**Personnel Department**—The total number of active employees as of June 30, 1953—2,985.

Civil Service Constitutional Amendment becomes effective as of June 30, 1953; therefore, for months prior to this date Classification Questionnaires were obtained from employees to determine correct classifications, conferences were held with Department Heads and representatives from the Department of State Civil Service, all of which entailed a marked increase of work for this Department; and it was only through the co-operation of the Sisters of Charity and the Department Heads working tirelessly that this was accomplished.

#### ACKNOWLEDGMENTS

We wish to take this opportunity to thank the Sisters of Charity for their unflinching interest, splendid co-operation and untiring labor.

We want to express appreciation to the Deans of the two medical schools, Dr. W. W. Frye, Louisiana State University, and Dr. Max Lapham, Tulane University. They have worked with us and have thus helped to create a close harmony between the hospital and the medical schools.

To the Visiting, Resident and Intern Staffs, our sincere thanks for their loyalty and splendid support.

The Volunteer Workers, under the guidance of Miss Florence Jennings, have rendered very valuable services to this Institution during the year.

The ladies of the Charity Hospital Guild have, as always, given of their very valuable time, and we are grateful.

We also wish to express our appreciation to the National Council of Jewish Women for their generous contribution in the form of a Pediatric Recreational Program, under the direction of Mrs. Amy Harrison.

To the Board of Administrators we express our appreciation for their guidance and loyal support, and we are deeply grateful to the Assistant Directors for their wholehearted assistance. The Secretary-Treasurer, Mr. L. A. Millet, Heads of all Departments, and the entire personnel of the hospital, nurses and workers in all departments, all have our deepest gratitude for their loyalty, devotion and wonderful co-operation.

Respectfully submitted,

WM. AUGUST WORNER,  
Vice-President Board of  
Administrators

E. L. LECKERT, M.D.,  
Director Charity Hospital of  
Louisiana at New Orleans

## CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

### COMMENTS ON OPERATIONS

Cost of operation for ordinary recurring expenses for the fiscal year ended June 30, 1953, compared with the previous fiscal year increased \$454,112.69, or 5.63% as evidenced by the following comparative analysis:

	FISCAL YEAR		% In-	
	1952-1953	1951-1952	Increase	crease
Salaries .....	\$5,352,506.14	\$5,073,185.60	\$279,320.54	5.50
Food .....	952,072.90	935,963.79	16,109.11	1.72
Drugs and Surgical Supplies .....	1,281,400.92	1,175,896.68	105,504.24	8.97
Other Operating Expenses .....	810,024.08	767,415.13	42,608.95	5.55
Repairs and Maintenance Expenses .....	126,033.30	115,463.45	10,569.85	9.15
	<u>\$8,522,037.34</u>	<u>\$8,067,924.65</u>	<u>\$454,112.69</u>	<u>5.63</u>

#### Comparative Statement—Means of Financing

	1952-1953	1951-1952	Increase	Decrease
State Appropriation .....	\$8,464,514.00	\$7,760,031.00	\$704,483.00	
Bond Liquidation Fund ....	279,017.50	214,879.29	64,138.21	
Federal and Other Grants	238,049.04	227,534.68	10,514.36	
Miscellaneous Revenues		181,100.86		\$181,100.86
	<u>\$8,981,580.54</u>	<u>\$8,383,545.83</u>	<u>\$779,135.57</u>	<u>\$181,100.86</u>

By special Legislative Act the Hospital was permitted to retain Miscellaneous Revenues collected during the fiscal year 1951-1952. It is to be noted, however, that funds provided for the fiscal year 1952-1953 exceeded the previous year's funds by \$598,034.71.

Expenditures during the fiscal year were made in accordance with the provisions of the State Budget Act, that is, the cost of operation was within the Means of Financing for the fiscal year ended June 30, 1953.

As of June 30, 1953, there were 3,076 employees on the payroll as compared with 2,947 as of June 30, 1952, an increase of 129. Very few salary increases were granted employees during the first eight months of operation, however, during the months between March and June increases in pay were granted to a substantial number of employees to the extent of increasing our payroll cost approximately \$22,000.00 per month.

During the fiscal year 2,304 persons were employed and 2,175 released, accounting for a total labor turnover of 63.12%. There were 20,890 man-days lost due to illness.

The employees in the Maintenance and Engineering Departments were paid \$30,607.71 for overtime work during the fiscal year.

The cost of food consumed increased \$16,109.11, as compared with the previous year, which cost can be attributed to an increase of 39,179 patient-days over last year.

During the year we received from the U. S. Surplus Commodities Corporation food evaluated at \$30,105.25 which is not included in the cost of food consumed.

The cost of Drugs, Medical and Surgical Supplies consumed, as compared with the previous year increased \$105,504.24, or 8.97% accounted for as follows:

	Fiscal Year		% In-	
	1952-1953	1951-1952	Increase	crease
Drugs .....	\$ 586,058.19	\$ 574,105.64	\$ 11,952.55	2.08
Medical and Surgical Supplies .....	530,501.44	461,725.55	68,775.89	14.90
X-Ray Films and Photographic Supplies .....	164,841.29	140,065.49	24,775.80	17.69
	<u>\$1,281,400.92</u>	<u>\$1,175,896.68</u>	<u>\$105,504.24</u>	<u>8.97</u>

The number of bed patients admitted during the year amounted to 65,239, compared with 62,712 admitted the previous year, an increase of 2,527 patients. 602,533 patients were given treatment in the Clinics, compared with 603,788 the previous year, a decrease of 1,255 patients.

The average cost per patient-day increased twenty-eight cents (28¢) and the average cost of treatment of clinic patients increased two cents (2¢) as revealed from the following comparative statement:

	Fiscal Year		Increase	Decrease
	1952-1953	1951-1952		
In-Patient-days .....	847,719	808,540	39,179	
Average cost per patient-day .....	\$9.26	\$8.98	\$ .28	
Out-Patient Visits .....	602,533	603,788		1,255
Average cost per patient-visit .....	\$1.12	\$1.10	\$ .02	

#### Inventory-Materials and Supplies—\$303,566.72

	6-30-53	6-30-52	Increase	Decrease
Pharmaceuticals .....	\$ 85,696.04	\$ 76,522.10	\$ 9,173.94	
Food .....	12,969.80	8,986.31	3,983.49	
Household Supplies .....	44,149.82	46,895.99		\$2,746.17
Office and Multigraph Supplies .....	8,856.39	8,090.77	765.62	
Maint. Materials and Supplies .....	60,157.54	60,259.18		101.64
Medical and Surgical Supplies .....	91,737.13	70,606.98	21,130.15	
	<u>\$303,566.72</u>	<u>\$271,361.33</u>	<u>\$35,053.20</u>	<u>\$2,847.81</u>

At the end of the fiscal year June 30, 1953, physical inventories were taken of all consumable materials and supplies in stores, necessitating adjustment of book inventories by a charge-off of \$4,079.92 due to shortages.

All materials and supplies were evaluated at cost.

**Contractual Commitments—\$141,568.69**

	6-30-53	6-30-52
Contractual Services .....	\$ 33,188.17	\$ 4,539.01
Materials and Supplies .....	99,280.06	52,207.28
Equipment .....	9,100.46	13,314.13
	<u>\$141,568.69</u>	<u>\$70,060.42</u>

Commitments represent Purchase Orders issued and applied against the fiscal year's appropriation for which deliveries were not effected as of June 30, 1953. Of the total amount of orders outstanding for Contractual Services, there is included a purchase order for \$28,530.00 with the Otis Elevator Company for elevators that were in process of being repaired as of June 30th. Of the amount of \$9,100.46 committed for Equipment is an order for one Cadillac Ambulance in the amount of \$6,388.60.

**Capital Expenditures**

Expenditures for additional and replacement of worn out equipment out of "Operating Funds" amounted to \$68,531.70, compared with \$148,880.63 expended the previous year. Equipment purchased out of Trust Funds during the year amounted to \$78,032.04. See detail statement, Schedule I-C of equipment purchased.

**Sundry Revenues**

Collections during the year for services rendered ineligible patients, fees, licenses and miscellaneous income amounted to \$183,797.87, as compared with \$181,578.44 received the previous year, an increase of \$2,697.01, accounted for as follows:

	1952-1953	1951-1952	Increase	Decrease
Patients Services .....	\$ 81,107.19	\$ 83,586.94		\$2,479.75
Licenses .....	26,392.50	25,068.50	\$1,324.00	
Fees .....	55,909.86	52,866.98	3,042.88	
Sundry .....	20,388.32	19,578.44	809.88	
	<u>\$183,797.87</u>	<u>\$181,100.86</u>	<u>\$5,176.76</u>	<u>\$2,479.75</u>

By special Legislative Act of June, 1950, the Hospital was granted permission to retain all collections of Sundry Revenues received up to June 30, 1952, as a means of financing the operation of the Hospital. As of July 1, 1952, this law became ineffective and we have paid into the State Treasury all Sundry Revenues collected during the year. However, as in the past we were permitted to retain Federal and other grants to the Hospital, of which we received \$238,049.04 during the year, compared with an amount of \$227,534.68, the previous year, an increase of \$10,514.36.

**Visitors' Food Service Department**

The operation of the Food Store is financed by a separate Legislative appropriation of \$7,500.00 as a Revolving Fund subject to be returned to the State Treasury should the operation of the Food Store be discontinued.

Net profits earned during the fiscal year amounted to \$13,340.67, compared with \$8,966.04 received the previous year, an increase of

\$4,374.63. Prior to March 1, 1953, profits earned from the operation of soft drinks and other vending machines were included in the gross earnings of the food store. On March 1st. contracts were entered into with various distributors of soft drinks, etc., for the handling of vending machine sales on a commission basis. Commissions earned from March 1st. to June 30, 1953, amounted to \$7,226.75. On that basis commissions earned from that source during the fiscal year would have amounted to approximately \$21,680.16 which would, in consequence, account for a net loss in the operation of the food store, exclusive of commissions, of an amount of \$8,339.49.

### Accounts Receivable

Miscellaneous Accounts Receivable of record as of June 30, 1953, viz: \$9,240.71, are current obligations due the Hospital and are considered 100% collectible. The amount of \$20,815.85 due by the National Foundation for Infantile Paralysis represents charges against the Parish Chapters and is guaranteed by the Foundation.

### Employees Retirement Plan

During the fiscal year the hospital's contribution to the Employees Retirement Plan amounted to \$282,194.40 as compared with \$269,734.77 the previous year, an increase of \$12,459.63. The employees' contribution to the fund through payroll deductions amounted to \$235,169.52.

### Accounts Payable—\$381,796.85

All obligations incurred and due by the Hospital as of June 30, 1953, are current and accounted for and liabilities set up therefor.

Following our customary practice, we have taken advantage of all cash discounts in accordance with the terms of purchase contracts. Cash Discounts earned during the year amounted to \$29,018.00. During the same period we have paid \$46,588.57 in State Sales Tax.

### School of Physical Therapy

On July 1, 1952, the School of Physical Therapy was established and the first eight students were admitted to the School on September 10, 1952, who are to complete their course of training on November 20, 1953.

Th cost of operating the School for the fiscal year amounted to the sum of \$24,728.20. The cost per student under training for the year is as follows:

		Average Cost
Salary Cost .....	\$19,981.65	\$2,497.70
Special Lectures .....	2,185.00	273.13
Other Direct Expenses .....	2,561.55	320.20
	<u>\$24,728.20</u>	<u>\$3,091.03</u>

### Surplus—June 30, 1953—\$467,807.89

The surplus as of June 30, 1953, shown on our balance sheet, is represented by the following summarized current assets:

Inventory—Materials and Supplies .....	\$303,566.72
Purchase Orders outstanding 6/30/53 for which funds have been committed .....	141,568.69
Prepaid Insurance .....	21,633.98
Deposits on Containers .....	1,038.50
	<u>\$467,807.89</u>

**Trust Funds**

During the fiscal year various donations to the Hospital were received amounting to \$18,939.30, as follows:

Restricted as to Use .....	\$ 14,749.63
Unrestricted as to Use .....	4,189.67
	<u>\$ 18,939.30</u>

We received a sum of \$16,697.14 from Federal Grants representing the final payment of its contribution for the renovation of the Neuro-Psychiatric Unit.

Income received from investments of Trust Funds amounts to \$125,442.64, represented by the following:

	Restricted	Unrestricted	Total
Interest .....	\$ 15,343.28	\$ 52,812.56	\$ 68,155.84
Rent .....	21,096.46	9,625.13	30,721.59
Royalties .....		2,840.54	2,840.54
Leases .....	4,153.00	6,160.35	10,313.35
Dividends .....	502.00	12,909.32	13,411.32
	<u>\$ 41,094.74</u>	<u>\$ 84,347.90</u>	<u>\$125,442.64</u>

Expenditures out of Trust Funds during the fiscal year amounted to \$192,152.35.

	Restricted	Unrestricted	Total
Salaries .....	\$ 12,033.20	\$ 2,100.00	\$ 14,133.20
Indigent Patients Welfare .....	7,478.09	235.62	7,713.71
Repairs to Trust Fund Bldgs. ....	4,695.37	11,795.60	16,490.97
Repairs and Renovation to Hospital Buildings .....	69,974.92	1,599.00	71,573.92
Capital Expenditures .....	13,821.83	68,418.72	82,240.55
	<u>\$108,003.41</u>	<u>\$ 84,148.94</u>	<u>\$192,152.35</u>

**Trust Fund Investments—Bonds**

At the end of the fiscal year, June 30, 1953, investments in Bonds, after amortization of Bond discounts and premiums, amounted to \$2,270,104.47, of which \$1,300,585.23, or 57.29% represents investment in U. S. Treasury Bonds and \$969,519.24, or 42.71% in State and Municipal Bonds.

**Bond Liquidation Fund**

During the year \$288,000.00 of Bond obligations were retired and total interest on bonded indebtedness amounting to \$227,633.75 was paid. As authorized by the Board of Administrators, \$303,896.79 was transferred to Operating Funds. After setting up a reserve for bond retirement and interest on bonds amounting to \$409,991.25, there remains a balance of \$300,453.03 in the Bond Liquidation Fund as of June 30, 1953.

Respectfully submitted,

L. A. MILLET  
Secretary-Treasurer

**ANNUAL REPORT OF THE SISTERS' DIVISION****Fiscal Year July 1, 1952 to June 30, 1953****SISTER ANTONIA, Director**

Inasmuch as detailed reports are being submitted by the various departments of the Sisters' Divisions, this report will be brief and of a general nature.

The over-all planning coordination, and control of the activities of the Nursing Department, the Schools of Nursing, both Professional and Practical, the Dietary Department, and the Housekeeping Department, are all centered in the Sisters' Division, have functioned smoothly and satisfactorily during the past fiscal year.

The Professional School of Nursing was advised to apply for Full Accreditation, this will involve certain vital changes both in the Educational and Service program, to meet the National Accreditation, however if this can be attained, it will prove very valuable in the recruitment of young women for our school of nursing, by raising the standards we hope to achieve greater efficiency, which will mean better care of our patients, and upon successful completion of their professional nursing course, we hope to recruit qualified members for the Nursing Staff, at Charity Hospital.

The School of Practical Nursing received Full National Accreditation in January of this year (1953) we feel this will be a great incentive in the recruitment of young women wishing to enter this type of Nursing Service, as the prospective student is well aware that this would mean an efficient Educational and Service program, and upon the completion of their training, we hope to retain them on the nursing staff of Charity Hospital, to give the much needed good bedside care for which they have been efficiently prepared to carry out, and relieve the professional nurse for the more intricate duties, which in the practice of modern medicine they are called upon to do.

The Nursing Service Department continues to give efficient service to the various departments, despite the fact of the professional nurse shortage, while the task has been most arduous, effort has been made to give service to the patients. We wish to commend the Sisters' the Graduate Nurses' for their untiring generosity in taking additional duties to supply for the vacancies in the graduate staff.

The Anesthesia Recovery Room continues to render valuable service, and during the early part of the year, it was thought advisable to add another room for contagious cases, who had to be operated upon, and therefore would have to be isolated. This year a ten bed ward was opened as a rehabilitation unit, these patients receive special medical treatment, reports to date are very favorable, in conjunction with this unit, there is an outpatient clinic which is held weekly, and patients are advised the type of treatment they may continue at home.

The Dietary Department has completed another successful year, the high standards of the food service to patients and personnel have been maintained, and the training program of Dietitians has met the requirements of the American Dietetic Association.

The housekeeping throughout the hospital and living quarters of the personnel has been efficiently carried on through the past year. A series of educational conferences to this department have been given, and have proved very beneficial, by improving the methods of cleaning, also it has been a great help in stimulating the morale of the workers.

Respectfully submitted,

SISTER ANTONIA

Director of the Sisters' Division.

.....	40
<b>Total</b> .....	<b>1,308</b>

During the fiscal period, July 1, 1952 through June 30, 1953, there was a daily average of two-thousand, three-hundred and twenty-three patients at Charity Hospital. Of this number, there was a daily average of approximately five-hundred and ninety-four patients in the five out-lying buildings—Dibert, Colored Tuberculosis, White and Colored Tuberculosis, Poliomyelitis Center, and Isolation.

As of June 30, 1953, the number of persons employed in the Nursing Service Department for in-patients was as follows:\*

**Professional Nurses**

148 .....	Supervisory Staff (Supervisors—Religious and Lay, Assistant Supervisors, and Head Nurses)
160 .....	General Duty Staff (Part-time and Full-time)

**Non-Professional Workers**

680 .....	Practical Nurses, Nurses' Aides, and Attendants.
-----------	--

The figures above indicate that among the personnel employed at the bedside, there was a ratio of approximately one professional staff nurse to four non-professional workers. Nineteen percent of the total personnel were professional staff nurses, and eighty-one percent were non-professional workers.\*\*

At the present time, there are no reliable standards available which indicate the number of nursing hours needed per patient in twenty-four hours, nor what proportion of nursing care should be of professional service and what proportion of nursing care should be of non-professional service. It is necessary therefore to study the factors which affect their particular time requirements, such as the character of the general nursing staff, and the manner in which the nursing service functions, whether the team plan is used and in what it consists.

As one looks at present conditions, one realizes more and more that nursing services are, in many places, relying less and less upon student service. The task of producing and maintaining an adequate nursing staff requires using every means available. It is not likely that a sufficient number of students will enter the basic professional course in nursing, and for this reason, it becomes evident that we cannot depend alone upon this group as an adequate source of supply. The practical nurse group is looked to as a potential source of supply for meeting certain nursing needs.

Since there is nothing to indicate that there will be a plentiful supply of nurses in the foreseeable future then, all the resources at one's command have to be drawn upon in an effort to solve some of the problems in the hospital.

\*Figure exclude personnel in the Accident Room, Admitting Rooms, Clinics, Operating Room, and Central Supply Divisions.

\*\*Supervisory Staff excluded.

Investigation and careful study of facts disclose a shortage of nursing service but not always a shortage of nurses. Graduate, professional nurses are still performing tasks that less skilled people could do. They are still responsible for duties that rightfully belong to non-professional workers.

Among the fourteen recommendations of the National Nursing Organizations represented on the Joint Committee on Nursing in National Security, it was recommended that administration of nursing service be improved so that nursing skills would be used to the best advantage; that nursing service be stabilized as much as possible and turnover of staff be held to a minimum through the adoption and application of sound personnel policies for nurses and allied workers; that there be an active program to secure the cooperation of physicians, hospitals, public health authorities, and the general public in rationing nursing service to cover the most essential needs; that as many practical nurses be trained and employed to help professional nurses as hospitals and other community agencies could utilize to a good advantage; that studies be instituted immediately to provide a sound basis for planning, and that selected nurses be encouraged to prepare for responsibilities as teachers, supervisors, and administrators as well as for the special field, in order to safeguard essential nursing service.

Among the reasons given for the need to improve the administration of nursing are: the mounting demands for nursing service created by the rising standard of medical service, the rapid application of new scientific discoveries for the benefit of patients and the variety of workers who participate in providing nursing service.

In planning for patient care, it is recommended that there be a common meeting ground where representatives of the central administration, the medical staff, and the nursing staff, may discuss together their corporate responsibility for the care of patients, coordinating independent plans and mutually finding satisfactory solutions for their interrelated problems. A committee composed of the physicians-in-chief, the hospital administration, and representatives of nursing service might serve as a nucleus with such others as may be indicated.

## ORIENTATION PROGRAM FOR GRADUATE PROFESSIONAL AND NON-PROFESSIONAL NURSES

The aim of the orientation program is to provide more effective patient care and to reduce the turnover of nurse personnel through satisfactory adjustment of newly appointed nurses to the Charity Hospital nursing staff.

The period of orientation is one week, during which time the nurse learns the physical plan facilities of the hospital, the responsibilities of her position, personnel practices, and becomes aware of the policies, procedures and methods within the hospital for integrating all the services directed toward patient care. Since the inauguration of this program, 113 nurses have received the benefits of the orientation period.

## STAFF EDUCATION AND IN-SERVICE PROGRAM

The objective of the staff education program carried on in the Nursing Service Department during the past year was the development of the nurse on the job. Meetings were arranged which provided an opportunity for participation in programs designed to promote an understanding of problems and their solutions, improve technical skills, and increase the efficiency of the individual nurse.

The in-service program included activities to promote the efficiency and development of clerical personnel and a continuation of the training of auxiliary employees and nurse aide trainees for nurse aide positions on our staff. The number of hours in the nurse aide course was increased from 54 to 87. Enrolled in the course from July 1, 1952 to June 30, 1953 were 115 employees and trainees, 87 of whom successfully completed the course and were employed in Nurse Aide 2 positions.

## PERSONEL HEALTH CLINIC

The Health Clinic was established in March 1952 as an out-patient department for graduate nurses, resident physicians and interns and their wives, dietitians, medical technicians, and student nurses. The purpose was to improve the health service offered and to conserve the time of both resident physicians who staff the clinic and the personnel who require the service.

The services rendered by the Clinic has been invaluable in that it has more than met the need for which it was established and has also made it possible to have a complete physical examination including a chest X-ray done on all new nurses appointed to the staff of the Nursing Service Department.

There was a total of 4,096 visits made to the clinic during the past year.

## SPECIAL REPORT ON THE WORK OF THE NURSING SERVICE PERSONNEL WITH THE FACULTY OF THE SCHOOL OF NURSING

The Nursing Service Committee on Nursing Procedure Revision was reorganized in October 1952 with representation from Nursing Service and the Schools of Professional and Practical Nursing. The function of this committee is to review and keep current nursing procedures. Ten procedures have been evaluated and reconstructed in the past year.

A second project carried on jointly was the reconstruction of the Daily Nursing Service Time Sheet. The new form which was put into effect in November 1952 gives more comprehensive and accurate statistical data.

Conservation week sponsored by the School of Nursing and Nursing Service was observed during the week of May 18, 1953. This project was very successful because of the combine interest and participation by personnel of all the departments of the hospital. The program included a sketch, exhibits, films, and speakers, all stressing the conservation of supplies.

The Surgical Prep Team was put into effect in July 1952 with supervision provided by the Central Service Department. The function of this Team is to do surgical preps on patients. The Team functions from twelve o'clock p.m. By assigning this repetitive task to a team of employees trained in this activity, the nursing personnel in all areas except Pediatrics, Obstetrics, Communicable Diseases, and Tuberculosis are able to give more adequate nursing care to their patients because of being relieved of 5,124 surgical preps.

## PREMATURE STUDY

The study of nursing service in the Premature Infant Center by the Urban Life Research Institute of Tulane University was completed during this year. This study attempted to describe the ongoing activities, the social organization, and goals of the Premature Infant Center. The study dealt with the Center in terms of its institutional aspects; the defined responsibilities of social organization and the part these responsibilities played in achieving the stated goals of the Center. The evaluation of these activities and social organization was made in terms of how well they provided for the accomplishment of the goals of the Center.

In addition to discussions of some historical and sociological factors influencing the functions of the nursing service personnel in the Center the report of the study includes discussions and charts of the formal and informal organization of the unit. The formal organizational chart was developed from the written plan for organization of the Center.<sup>1</sup> The informal organization chart was based on data collected through observation of the activities of the Center and interviews with members of the staff.

A job evaluation was done in which members of the staff were asked to evaluate the relative importance of tasks in the Center. This data was supplemented by an analysis of the work flow and by tabulation and analysis of a representative sample of the charts of all infants admitted to the Center over a period of one year. It was determined that the majority of the nursing functions of the Premature Infant Center are routine and simple and require willingness to learn and devotion to duty for satisfactory performance.

The nursing requirements of the average infant admitted to the Center was also developed from the above data.

The weekly records of the assignment of members of the staff, and days off duty both assigned and unassigned were analyzed.

It is felt that the findings of this study should provide a basis for wiser and more realistic planning for the achievement of the goal of the Center. The major cost of carrying out the study was borne by the Louisiana State Department of Health with funds provided by Children's Bureau, United States Department of Health, Education and Welfare. Credit for successful completion of the study should be accorded the staff of the Premature Infant Center. Their cooperation on all phases of the research was whole hearted, and greatly appreciated.

With the approval of the Louisiana State Nurses Association the American Nurses Association has provided funds for extending the study to the medical and surgical nursing departments of the hospital. This project is well under way and should not only provide information which will be of equal value to these departments as that furnished the staff of the Premature Infant Center, but, because of its broader scope, should result in some generalizations about problems related to nursing functions in other areas of this hospital and some other hospital.

(Members of the Staff of the Urban Life Institute engaged in the research described above are: John H. Rohrer, Director; Virginia H. Walker, R.N.; Robert C. Stone; C. W. Wing, Jr.)

<sup>1</sup> *Special Project Training Program in the Care of Premature Infants.* Revised. (New Orleans: Louisiana State Department of Health.) 1952.

## ANNUAL REPORT OF THE SCHOOL OF NURSING FOR THE FISCAL YEAR

July 1, 1952 to June 30, 1953

Within the last year 66 students were graduated from the school of nursing, of which 46% were subsequently employed at Charity Hospital. During the same period the school has admitted 126 students from a total of 238 applicants. This represents a definite decrease in the number of applicants compared to previous years. One possible cause for this decrease may be found in competition from other local schools which offer the advantages of National Accreditation, College affiliation, and more desirable study and working conditions. Another possible cause may be an inadequate recruitment program with a budget providing for too few visits to surrounding areas.

### ACCREDITATION

In view of the above apparent disadvantage which results from our lack of National Accreditation, it appears fitting to examine this problem more closely. Our school is fully accredited by the State of Louisiana, but only temporarily accredited by the National Nursing Accrediting Service. The temporary rating will expire in 1955, at which time we must either be permanently accredited, or listed as unaccredited.

We feel that the school of nursing should apply for accreditation for the following reasons:

1. Charity Hospital's other educational units are fully accredited and the school of nursing should not be an exception.
2. Because of its unusual facilities and teaching advantages this school has an obligation to the entire southern area. Accreditation is required to properly meet this obligation.
3. The prestige afforded by such accreditation would prove beneficial in the recruitment of students and the obtaining of affiliations with other schools.
4. Application for full accreditation was strongly recommended by a representative of the National Nursing Accrediting Service at a recent visit to the school.

National Accreditation will require certain expenses for a survey; some changes in the type of service provided by students with emphasis on educational experience rather than coverage of all areas; and the utilization of facilities not presently contributing to student education, such as the Out-patient department and the Polio center.

### STUDENT ACHIEVEMENT

In connection with the above it is felt that further educational opportunities and more conservative use of students' services under adequate supervision would very definitely improve the achievement ratings of our students on State Board Examinations. Regrettably, we must report that these ratings in a few areas do not compare favorably with those of other students within the state.

### STUDENT WELFARE

In an endeavor to continue the improvement of conditions pertaining to the health and welfare of our students, we have obtained the appointment of a Health Nurse whose services have already provided encouraging results in lowering the incidence of student illness.

There is, however, a definite need to improve working conditions for the students, particularly with regard to excessive evening and night duty assignments. The work load of the students is too heavy and the responsibilities they are required to assume with little supervision produces tension, anxiety, and dissatisfaction.

Certain conditions existing in the Residence do little to alleviate the stress produced by hours on duty. The Residence provides no separate sleeping quarters for night duty nurses, thus making it extremely difficult for roommates working different shifts to secure adequate rest. Classes frequently have to be scheduled at hours which compel night duty nurses to arise before they have obtained sufficient sleep. We have an inadequate number of classrooms in the Residence which requires classes to be scattered here, in the main hospital building, and at the L.S.U. Medical School. Over a period of years we have been requesting air conditioning for some of the classrooms which are noisy because of their location above the kitchen and the cafeteria, and poorly ventilated.

In addition, there is a serious lack of outdoor recreational facilities for students on their off duty hours. While the Residence has abundant yard space which could be profitably utilized, the student nurses presently depend for outdoor recreation on one tennis court, on the hospital grounds, shared with Psychiatric patients, L.S.U. Medical students, and Tuberculosis patients.

#### LOUISIANA STATE BOARD OF NURSE EXAMINERS ANNUAL REPORT

The annual visit of the Louisiana State Board of Nurse Examiners was made this year by Miss Hazel Goff of the National Nursing Accrediting Service at the request of the State Board. Miss Goff was favorably impressed with both the school and the hospital, and her report was encouraging. She expressed the opinion that our school could be made the outstanding nursing school in the southern area because of the unusual advantages presented by its rich clinical material and adequate, up-to-date equipment.

Among the recommendations made in Miss Goff's report the following seem to be most significant:

1. That a cost analysis of the school be undertaken;
2. That the school apply for full accreditation;
3. That students be assigned primarily to certain teaching units where there is interest on the part of head nurses and supervisors in the students' learning experience;
4. That serious thought be given to providing an adequate educational building attached to the nurses' residence where major class activities may be centralized;

To the above recommendations we would like to add the following:

1. That the classrooms located above the kitchen and cafeteria be air conditioned to eliminate noise;
2. That sleeping quarter facilities be provided for Night Duty nurses;
3. That tennis and soft ball courts with lighting be provided on the nurses' residence grounds.

## ADMINISTRATIVE AND TEACHING STAFF

**Director:**

Sister Pauline, R.N., M.S.

**Assistant Directors:**

Sister Urban, R.N., B.S.  
 Sister Gertrude, R.N., B.S.

The School of Practical Nursing was opened on March 15, 1950. One hundred and six students have graduated to date. Of this number, one hundred percent have passed the Louisiana State Board of Practical Nurse Examiners Examination and received their license to practice.

As of June 30, 1953, a total of forty-two students were enrolled. Nineteen students will graduate in September 1953, at which time a new group of students will be admitted.

In December, 1952, the School of Practical Nursing was surveyed by the National Association for Practical Nurse Education. The Accrediting Committee commended the many constructive changes and excellent progress made since their last visit. Full accreditation was granted by the National Organization in January, 1953.

**SISTER FLORENCE, R.N.**

## ANNUAL REPORT OF THE DIETARY DEPARTMENT

July 1, 1952 to June 30, 1953

## ACTIVITIES AND ACCOMPLISHMENTS

Sixteen dietetic interns were graduated during the past year, two of whom accepted positions on the staff.

Special clinic service instruction was made available to medical students by our staff. Medical students observe and participate in metabolic clinic while patients are receiving diet instructions.

The American Dietetic Association inspected our Dietetic Internship in January and again approved it to be continued. Recommendations for one major change was made for the dietetic intern to receive experience in Pay Cafeteria Service at Baptist Hospital. Plans were begun for this to go into effect this following year.

The Dietary Department has cooperated with Tulane and Louisiana State University Medical Schools on several studies. One study was done on the excretion of niacin and tryptophan metabolites following the use of Rimafon on tubercular patients. There is constant contribution by the Dietary Department to the studies done by the Nutrition Division of the Tulane Department of Medicine.

619 patients participated in class discussions on food preparation for diabetic patients. Classes for obstetric patients, including normal and therapeutic diets totalled 15,018. The total number of diet instructions by Nutrition Clinic this past year was given to 36,651 patients.

Several members of the Dietary staff had contributed personal time and effort to the completion of a Mass Feeding Manual for the State Civil Defense Committee. A Pantry Shelf Emergency Ration Pamphlet for Family Use was also made up. Both of these publications will be made available for use throughout the state in case of a natural or man-made disaster.

With the renovation of the Contagious building, an entirely new kitchen was put into use. Several pieces of very efficient new equipment were installed.

Our Dietary staff has been depleted considerably by the loss of several experienced dietitians in the past year, many of whom were not replaced.

Comparative figures of meals served are listed below:

	1951-1952	1952-1953
Personnel Meals .....	1,381,930	1,418,830
Patient Meals .....	2,242,236	2,352,812

<b>Total .....</b>	<b>\$ 1,390,107.08</b>	

Respectfully submitted,

AGNES G. BLAZEK,  
Acting Director Dietary Department

## ANNUAL REPORT OF THE HOUSEKEEPING DEPARTMENT

July 1, 1952 to June 30, 1953

At the close of this year the department is operating with 285 employees, including 40 in the Linen and Sewing Section. Three Hospital Matron positions were abolished, and six additional positions were created as follows:

One Custodial Supervisor I. for night supervisor in the Main Section  
One Custodial Supervisor I., housekeeper for Professional Student Home

Three Custodial Workers I. for Colored T. B. Building

One Custodial Worker I. for the new Physical Therapy School section

The turnover of personnel during the course of the year was 215 (117 resignations, 69 removals, and 29 transfers to other departments). One resignation was due to retirement, 15 because of job dissatisfaction, 15 stated that the salary was inadequate, and 86 were due to external causes (moving out of town, home responsibilities, returning to school, ill health, etc.). Of the 69 removals, 33 were removed as unsatisfactory and 26 left without notice. The percentage of turnover averaged 6.55% per month.

On April 1, 1953, two hundred forty employees in the department received a raise in salary. This consideration was deeply appreciated, especially because a special effort was made by the hospital authorities to obtain it.

On June 9, 1953, germicidal disinfection of walls, floors, furniture and fixtures was done in the Premature Nursery to combat an epidemic of URI infection.

20 venetian blinds in the Student Nurses Residence were renovated and refinished.

Extensive repairs were made to two pianos which were put in good working condition (one on 19th floor gymnasium, one in Protestant Chapel).

Matchstick bamboo drapes were installed on three solarium, W-6th floor Main building, and on the 3rd and 4th floors of Polio-Center.

855 new Seeco spring covers were purchased for Doctors Quarters and Nurses Residence.

34 new ward chairs were purchased (24 for Colored T. B. and 10 for Ward W-1108).

10 new wall fans were installed on the 4th floor, Main building.

One new steel rack truck was purchased for Isolation Unit for transportation of trash from building.

555 mattresses were renovated (331 from personnel quarters, 224 cotton layer felt from ward units).

334 uniforms were purchased for women employees and 264 sold.

In the Salvage Division \$2,823.78 worth of salvage material was sold to salvage dealers.

The floor maintenance work has been carried on with some difficulty. The floor covering on some of the floors is in bad condition, and the best

of maintenance could not improve the appearance. The floor polishing machines too are in bad condition and need to be replaced. If at some future time new floor material is under consideration, it would be a great saving of labor if Vinyl plastic could be procured; it does not require waxing or polishing, and will outwear any of the other floor materials as rubber or asphalt tile.

The Orkin Exterminating Company and the National Window Cleaning Company performed their services as per contract.

In the Sewing Section the following new material used in large quantity was issued to departments: 14,800 sheets, 6,856 pillow cases, 9,500 wraps for sterile supplies, 24,044 yds. of pajama material was purchased; 4,552 pajama suits made, 1,371 extra pajama trousers, 1,058 robes, 14,500 surgical towels, 6,792 bath towels, 7,988 huck towels, 14,232 wash cloths, and 1,574 hamper bags.

Respectfully submitted,

SISTER CLARISSE

Director of Housekeeping

Genito-Urinary .....	11,057
Spines .....	5,269
Skulls .....	9,064

Respectfully submitted,

MANUEL GARCIA, M.D., Director  
Department of Radiology

## CHEST X-RAY UNIT

July 1, 1952 to June 30, 1953

The Mass Chest X-Ray Unit continued to do a good job during the fiscal year of 1952-53. It was gratifying to learn that the National Tuberculosis Association asked Dr. Sydney Jacobs, X-Ray Consultant in charge of this Unit, to present a paper at the 49th annual meeting of the Association in Los Angeles, California. This paper, "The Economics of Case Finding" by Sydney Jacobs, M.D., and Arthur A. Calix, M.D., was presented before the Development Session in the discussion of the economics of case finding. It was stated that the purpose of a hospital chest x-ray unit is to find all pulmonary lesions in persons receiving or rendering medical services in any division of the hospital and to make possible speedy, effective, and economical diagnosis of these lesions.

Among the points brought out in this paper were the accessibility of such units, more likely subjects, economy (it costs 29.8 cents to take a single frame of 70mm film at the Charity Hospital—this is much lower than that reported from other similar units), speed of detection, ease of public health measures and convenience.

It was concluded that the photofluorogram is not a diagnostic agent; it is a screen. Its chief purpose is to detect those who need more intensive investigation and to follow them up so that a definitive pulmonary diagnosis may be accomplished.

The following is a breakdown of the films read during the fiscal year of 1952-53. We have added the 1949-50 figures for comparison:

	1949-50	1952-53
Shadows very strongly suggesting tuberculosis .....	60	17
Shadows suspicious of tuberculosis .....	1,756	2,562
Shadows suggesting other pathology .....	2,877	4,345
Negative .....	69,893	64,449
Unsatisfactory .....	1,426	556
Total .....	76,012	71,929
(Total Satisfactory) .....	74,586	71,373

Of the satisfactory 70mm films 3.59% were reported as tuberculosis and suspicious of tuberculosis and 6.04% were reported as having shadows suggestive of other pathology.

In addition to the small films taken, 648 large (14" x 17") chest x-ray films were taken of which 32 showed definite evidence of tuberculosis and 173 were interpreted as being suspicious of tuberculosis. (Other pathology, other than tuberculosis, was found in 66 of the large films.)

## 1952-53 Large Film Breakdown:

Tuberculosis .....	32
Suspicious of Tuberculosis .....	173
Other Pathology .....	66
Negative .....	374
Unsatisfactory .....	3
Total .....	648
(Total Satisfactory) .....	645

We are again able to report on the cardiac cases which have been found as a by-product of our Mass Chest X-Ray Survey. Patients whose film is interpreted as showing a cardiac abnormality by the physician

who reads the x-ray films are referred to a cardiologist who then decides whether the abnormality should be investigated further by one of Charity Hospital's Clinics.

During the fiscal year (1952-53) 2151 cases were found to have a film suspicious of heart disease. Since 71929 small films were taken 2.99% of these films were found to have some evidence of heart disease. Of this number of suspicious cases referred to our cardiologist, he felt that 294 cases were serious enough to merit a clinic investigation. Thus, 13.66% of the patients whose films were found to have some evidence of cardiac disease by our Tuberculosis Consultant, were referred to a cardiac clinic.

The Chest X-Ray Unit of the Charity Hospital is under the supervision of the Section of Chronic Disease & Tuberculosis of the Louisiana State Health Department.

Respectfully submitted,

ARTHUR A. CALIX, M.D., M.Sc. (Med.)  
Division of Preventive Medicine Chief,  
Section of Chronic Disease and Tuberculosis

## POLIOMYELITIS CENTER

July 1, 1952 to June 30, 1953

---

The Polio Center, located in the Laheyre Miltenberger Home for Convalescents, occupies the 2nd, 3rd, and 4th floors. Second floor is being used as the isolation ward.

During this year a total of two hundred ninety eight patients were admitted with a daily peak census of one hundred eighteen during the month of July. Out of this number two hundred twenty three were diagnosed and treated for poliomyelitis. There were 15 respirator cases and 13 deaths. Six of the 13 deaths were not due to poliomyelitis.

At this time our demands on electricity exceeded the number of outlets and circuits available, so emergency wiring was installed where iron lungs were in use. Later in the year all circuits on second floor were utilized in the form of permanent wiring. To further ease the electrical load in the Polio Center, fluorescent lights were installed throughout the building.

Tours have been conducted for student nurses from Nursing Schools of various private hospitals in New Orleans, Public Health Nurses, Students from Charity, and Practical Nurses.

Children at the Polio Center receive instruction from a teacher employed by the Orleans Parish School Board. Monthly birthday parties are sponsored by schools of New Orleans and directed by the teacher. Moving pictures are shown weekly.

Respectfully submitted

DOROTHEA ARMBRUSTER, R. N.  
Supervisor

**ELECTROCARDIOGRAPH DEPARTMENT****July 1, 1952 to June 30, 1953**

The accompanying report shows the work performed in the Heart Station from July 1, 1952 through June 30, 1953. The figures refer to the number of electrocardiograms taken in each month, and to the number of arterial oxygen saturation studies, cardiac catheterizations, angiocardigrams, and cardiac fluoroscopic examinations.

Many sound tracings of the heart were made during the current year but the breakdown for months is not available although the data were placed in the patients' records.

During the year cardiac clinics were conducted every afternoon, Monday through Friday, in order to maintain a closer check on patients with heart disease. There was also a pediatric cardiac clinic which is conducted every Friday.

Cardiac conferences were held every Thursday from 4:30 to 5:30 p.m.

## DEPARTMENT OF ANESTHESIOLOGY AND BLOOD BANK

July 1, 1952 to June 30, 1953

The Anesthesia Department, oxygen therapy department and blood bank carried on their functions as usual during the period beginning July 1, 1952 and ending June 30, 1953. A total of 15,913 anesthetics was administered approximately 75% of which were general consisting of cyclopropane, ethylene ether, vinyl ether—ether, nitrous oxide—pentothal. Spinal anesthesia, nerve blocks and local comprised the remaining cases.

The number of units of blood released for transfusions for the fiscal year were 19,808. The number of donors processed were 20,505. An additional technician was employed due to the increased demands upon the laboratory for service. A water softener was installed for the triple still in the processing room.

The newly remodeled contagious building was opened and the piping system for oxygen was placed into service. The annual consumption of oxygen for the entire department totalled 4,800,000 cubic feet. Thirty additional pediatric tents were constructed by the hospital shop and placed into service.

## LUNG STATION

July 1, 1952 to June 30, 1953

During the past fiscal year the Lung Station continued to serve its function as a service unit for the determination of pulmonary function as related to operative risk. Our services as a diagnostic unit for more difficult or obscure pulmonary disturbances has been hampered by obsolete equipment. However, this situation is to be remedied during the coming fiscal year. The expansion of diagnostic services to include bronchial lavage and the study of materials so obtained has been continued through the fiscal year with increased demand for this service. More therapeutic procedures have been carried out in the Lung Station than ever before.

The work of the year can be roughly divided into three categories. Pulmonary function studies, complete or partial, were carried out 400 times during the year. More restricted and specialized diagnostic studies, particularly in connection with cardio-pulmonary problems were done 49 times during the year. In the same category one may include specialized diagnostic procedures such as bronchial lavage: there were 36 such studies done. The therapeutic facilities of the Lung Station were utilized on 456 different occasions.

Respectfully submitted,

JOHN H. SEABURY, M.D.

SISTER MARGARET MARY,  
Supervisor.

**PREMATURE INFANT CARE CENTER****July 1, 1952 to June 30, 1953****PREMATURE COMMITTEE****Census**

In addition to routine matters reported and discussed at meetings of the premature committee, special consideration was given to the problem presented by the high census (peak daily census—155 in August 1952). The remodeling of the unit projected for this year was deferred because overcrowding became so acute that the question of providing a new larger unit for the nursery was raised and of course took precedence over the remodeling of an apparently inadequate unit. Consideration was first given, however, to other possible solutions for the high census problem. At meetings of the premature committee the following were suggested: (1) Improvement of other facilities in the state so that fewer premature infants would be referred to Charity Hospital, (2) development of another nursery unit on the 9th floor to be designated as the discharge nursery, and (3) a change in admission policy whereby babies over 2000 grams would not be admitted to the unit unless there were complicating factors in addition to the prematurity.

**Lafayette and Pineville**

It was felt that development of plans 1 and 3 would be most desirable and practical. Improvement of other facilities seemed most likely of achievement at Lafayette and Pineville Charity Hospitals where the L.S.U. and Tulane Pediatric staffs act as consultants. During the past year this improvement at each of these hospitals has occurred to the extent that new and adequate formula preparation facilities and technique have been obtained.

In addition, the Premature Infant Committee made recommendations for personnel and facilities needed at Lafayette, and indicated their interest and desire to cooperate in training these personnel when the hospital needed such help. It was felt that such training could best be carried out as an extension type of program, and would involve sending the Nursing Education Director to Lafayette for a period of 6 to 8 weeks, as well as utilization of local pediatricians, the consulting L.S.U. pediatricians and the nurse and physicians consultants of the State Department of Health. It was thought that Lafayette Charity Hospital might be ready for such a program in the spring of 1953, but became apparent that such a hope was overly optimistic; it may be that the Lafayette facility will be ready for training of personnel in the spring of 1954.

**Newborn Nursery**

Facilitation of plan number three was developed by the appointment of a special subcommittee of the premature committee whose function was to make specific recommendations to the end that hospital-born prematures in good condition and weighing over 2000 grams could be cared for on the newborn nurseries at Charity Hospital. This committee submitted a report recommending remodeling and improved staffing of the 10th floor nurseries to the hospital administration in April. This report had the endorsement of the Obstetric as well as Pediatric Departments of L.S.U. and Tulane.

Since neither of the preferred plans seems likely to be effected in time to relieve the expected high census from July through December, it seems quite possible that plan 2, or some variation thereof, may need to be developed as an emergency measure.

### Subcommittees

The committee felt that its functions could be more efficiently carried out by reconstructing its subcommittees, the subcommittees to meet as frequently as necessary and the committee as a whole to meet quarterly rather than monthly or bi-monthly as in the past. The subcommittees at present, therefore, are: Steering, Nursing Service, Nursing Education, Medical Care and Physician Education, Follow-up.

### Changes in Qualification Requirements

The committee considered and approved some proposed changes in the training program in regard to qualification requirements of nursing personnel. These proposed changes were not entirely acceptable to Children's Bureau personnel; they were discussed at great length with Miss Hockenberger at the time of her visit and the decision reached to defer further consideration of the revisions until the results of the Urban Life Research Institute survey were available.

### Equipment

The following new equipment has been received: Isolettes, 5; Isolette scales, 5; vapojettes, 6; alevizers, 5; Gordon Armstrong Incubator mattresses, 25; ophthalmoscope, 1; infant resuscitation, 1; rubber tubing sets for Beckman Analyzer, 5.

Because of the lack of any storage space on the unit an attempt has been made to evaluate usable equipment and eliminate unused and condemned equipment. In the process of maintaining equipment, it was found that a better organized system of providing and repairing equipment needed to be established and some steps in this direction were made. During the year, all isolettes were checked and repaired if needed, incubator plugs and wall receptacles checked and faulty ones replaced, and renovation of bassinet mattresses begun and PhisoHex containers are being replaced.

### Statistics

The statistical reports are presented in somewhat different form this year, the Charity Hospital born prematures being considered quite separate from those outside. This has been done in order to permit comparisons with the number of full term infants born at Charity Hospital; for the first time these full term infants and those prematures cared for on the full term nursery are included in the report. The incidence of prematurity was found to be 14%. See tables 1, 2, 3 and 4.

Table 5 shows the age at time of death for all deaths among babies admitted to the premature unit. Table 6 shows the age distribution of the mothers of prematures admitted to the premature unit for the first six months of 1953.

The incidence of retrolental fibroplasia is shown in table 7. As was the case last year, these figures are based on incomplete and casual reporting. For the year 1953-54, all infants under 1500 grams will have serial eye examinations and thus more accurate figures will be available.

ELAINE ALLEN, M.D.  
Medical Director

TOTAL .....	1116	903	81 %	7	1285	1001	70.7 %	2

- a. This figure is higher than previously reported because an additional case was diagnosed during this year.  
 b. Three other retrolental fibroplasia cases belong here if the now tentative diagnosis is confirmed at a later date.

The statistical reports for this fiscal year represent the first full period in which the data were collected by the current improved methods. For this reason, the figures are probably not strictly comparable with previous reports.

## CARE TO BABIES

### New Nursery Designation

The administration of proper care to the babies has been greatly facilitated by changes in the designated purpose of the nursery units. The babies are now assigned to the various units according to their age, condition, and type of care needed. Thus, on admission, all infants go to the "starting" unit. They remain there until the initial adjustments have been made, and are then transferred to the "growing" unit. From here, as discharge becomes imminent, they go to the "graduate" unit.

### Personnel

This change necessitated a re-assignment of personnel to afford the best possible care within the limitations in regard to number. To a large extent it has been possible to assign permanent personnel to the units and there has resulted greater consistency and continuity in the evaluation and management of the babies. This has resulted in closer cooperation between medical and nursing personnel. Changes in routine procedures for a particular group have also been accomplished much more smoothly than previously. We are still handicapped, however, by an insufficient number of nurses. The present assignment—and the gap between present number and needs is as follows:

Shift	Starting	Growing	Graduate	Isolation
7- 3	5-N	1-N X	N X	2-N
3-11	4-N X	1-N		2-N
11- 7	3-N	1-N		1-N X

N—nurse at present

X—additional nurse needed

The babies in the starting nursery include all those whose condition is poor (except for ill infants in isolation) and who need especially skilled care and evaluation. It includes all those who are gavage fed and who need supplemental oxygen. Many of them receive antibiotics. Thus most of the graduate nurses are assigned to this area. The above schedule—if the "X" positions were filled, would mean that they would always be at least 3 nurses assigned to duty on each shift and would give some leeway in covering emergencies such as illness. The number of babies cared for by this group fluctuates between 20 and 35 at a time.

In the growing nursery, at least one nurse would be on duty on each shift according to the above outline needs, and a relatively large number of aides are assigned to participate in the care here. The nurse is responsible for the charting, for supervising the feedings, and actually feeding herself any infants who are difficult feeders. She does the weighing, gives any medications, and helps the aides in evaluating the character of stools, feeding behavior or any other aspects that give clues as to the state of well being of the infants. This nursery is called upon to accommodate between 25 and 55 infants.

The graduate nursery should have two nurses assigned for a special shift 9 a.m. to 5 p.m. Since all of these babies are well, their care is limited to routine feeding and, of course, alertness for difficulty. It is possible for their nursing supervision to be carried out once in 24 hours—

usually by the nurse making rounds with the aides to discuss feeding behavior, number and character of stools, weighing, etc. The other "half" of the job in relation to these babies revolves around preparing the home to receive them. These functions have been described in the annual report for 1951-52 and have been curtailed to the extent that only one nurse has been available to perform them. Her absence due to days off, vacation, illness—and occasionally the need to assign her to other nurseries—has necessarily interrupted the program. The availability of another nurse prepared to help and substitute in this area would provide better service to the families and also permit closer supervision of the aides in the actual baby care.

The recommended number of nurses for the isolation unit is calculated to assure that at least one nurse would be on duty at all times.

It is felt that 3 fewer nurses for the night shift and 1 less for p.m. shift, than for day shift is justifiable because of the fact that routine physician's rounds, treatments, and certain procedures (e.g., "a.m. Care", moving of babies from one nursery to another) are not carried out on night shift, and occur less frequently on p.m. shift.

## GENERAL CHANGES IN PROCEDURES

### Oxygen Administration

A great deal of attention has been given to attempts at evaluating the need of these babies for oxygen. Only clinical evaluations have been made, and the current accepted criteria are respiratory or cardiac distress, or potential respiratory distress. These more specific indications have replaced those of just size and age. The result has been that fewer babies are given oxygen, and those who do receive it seem to do well when it is discontinued after relatively short periods.

### Temperature Control

It was noted that many of the small babies on this unit showed wide fluctuations in body temperature during the early days and weeks of life, and a continuing attempt is being made to correct this. A group of nurses carried out detailed and frequent observation of temperature and oxygen concentrations on infants. The conclusions suggested by their data were: (1) the single most important factor in producing a constant body temperature is a constant incubator temperature, (2) some small babies stabilize in a range around 92-94° and seem to do well, (3) an incubator should rarely, if ever, be set so as to register higher than 90°, (4) many factors other than the incubator temperature influence the baby's temperature. Some of these are: position of the baby in the incubator (e.g., lying against the wall adjacent to the heating unit), age, maturity, and state of infant's health, amount of activity of the infant, low humidity due to setting or failure to refill water pans. Therefore, (5) the incubator setting should not be changed except after evaluation of a baby's temperature behavior over a period of days; i.e., stabilization for several days in the 96-98° range with an incubator temperature of 90° F. would justify resetting for 86 to 88° environmental temperature. On the other hand, a single baby temperature of either 98° F. or 90° F. is not sufficient reason to either lower or raise the incubator setting—provided of course that it is working properly and the environmental temperature has not varied significantly from that constant being sought.

### Feeding Schedule

A change in feeding schedules for the infants in the discharge nursery has been effected; they are now fed every 3 hours instead of every 4 hours. Observations being made in the follow-up clinic confirmed previous impres-

sions that a 3-hour schedule would approximate more closely the self-demand routine selected by these infants. It should also be noted that over-crowding has necessitated discharging most infants at a weight of 2200-2300 grams and hence at an earlier age. This consideration as well suggested that the 3-hour schedule would be more suitable.

### **Supersaturation**

During the past few months equipment has been available for achieving supersaturation of the incubator atmosphere. The clinical impression has been that such super-saturation (with water or detergent solutions) has been of definite benefit to some infants with severe respiratory distress.

### **Formulas**

The formulas used on the unit are now essentially the same for all 3 services. The basic formula is whole cow's milk with 6% added carbohydrate (20 cal./oz.). The use of this standard formula throughout has encouraged the use of individualized formulae for particular infants presenting special problems. The most common example of a special problem is the small infant whose caloric needs are great but whose stomach capacity is limited.

### **Manual**

The revision of the first portion of the procedure manual has been completed. It is being bound in loose-leaf form in order to facilitate continuous revision and improvement as indicated.

### **Illness**

Twice during the year it was necessary to take extraordinary measures because of actual or potential epidemic disease. The first incident occurred in April when several infants in Nursery II developed frank diarrhea, and a number of others developed "suspicious stools." The precautions observed included transfer of sick infants to Nursery IV and closing of Nursery II to further admissions for a five-day period. There were no new cases during this period, and none since the nursery was re-opened. No deaths occurred among the sick infants and stool cultures gave no evidence that a single gastro-intestinal pathogen was responsible.

In June a number of infants in Nursery I developed colds over a 10-day period. Four of these babies developed pneumonia, and there was one fatality. The ill infants were transferred to Nursery IV and Nursery I was closed. When all remaining infants in Nursery I had been discharged, the unit and equipment were thoroughly washed before reopening.

These situations point up the need for developing accurate recording of diagnosis on these infants in order that morbidity as well as mortality statistics can be compiled.

### **Research**

The formula study conducted by the United States Public Health Service Diarrheal Disease Service Unit was concluded in the fall of 1952. No new research projects were started. Beginning in July, 1953, this unit will participate in a cooperative project investigating the possibility of a relationship between high oxygen concentrations and retrolental fibroplasia.

### **Follow-Up Clinic**

A special clinic for the follow-up of premature babies was started in January. Only L.S.U. babies have been seen to date but arrangements have been made for all babies weighing 1500 grams and less, regardless of

service, to be seen in the clinic starting in August 1953. The babies are first seen in the clinic about one month after discharge from the hospital; the frequency of subsequent visits is determined by the situation in each case. The clinic is staffed at present by two pediatricians on the Charity Hospital Visiting Staff, the Discharge Nurse, and the Medical Social Worker. It meets once a week. As the number of babies increase pediatric residents and fellows will be assigned, and additional nursing and clerical help may be needed.

### **Nursing Survey**

The study of nursing services begun in June, 1952, by the Urban Life Research Institute was completed in June, 1953. The primary purpose of this study was to define the types of services being rendered by professional and non-professional nursing personnel. The quarterly reports indicated that the collection of data proceeded smoothly; the final report has not yet been submitted.

## **EDUCATION**

### **MEDICAL**

#### **Physicians**

A 2-week post-graduate course for physicians was given in the fall. Six physicians attended; ten had been hoped for. The experience seemed to indicate that a 2-week course was unnecessarily long, that the material covered was not always adapted to the particular and varying interests of the students (public health officers, pediatricians in academic work, pediatricians in private practice). The Committee on the Premature Unit concluded that for the near future at least, educational opportunities for physicians could best meet individual needs and schedules if informal arrangements rather than formal courses were held. The opportunity to carry out this suggestion presented itself in the form of a visiting physician from each of three countries—Finland, Norway and Italy, who spent (separately) at least one month making rounds, attending conferences, and otherwise observing premature care. Several other physicians have visited for shorter periods. This program could be expanded by sending invitations to physicians in Louisiana (as a starter) to spend several days to 2 weeks visiting the premature and pediatric facilities of the hospital.

#### **House-Staff and Nurses**

Weekly and then bi-weekly joint medical-nursing conferences were held throughout most of the year. At these conferences cases were presented, routines re-evaluated and changes proposed and discussed. This conference was indefinitely discontinued in June; the heavy work load made nursing attendance impossible.

### **NURSE**

#### **Introduction**

Since April 4, 1949, Education has been provided to graduate nurses by means of a six weeks course in premature infant nursing at Louisiana State University. The learning experiences made available to students through the medium of this course have been of increasingly better quality reflecting not only nursing progress during these four years but also the relationship of education to this progress. That is, education is part of and prerequisite to progress in the nursing field. Therefore it would seem to be desirable to expand the educational program. A first attempt at such expansion should include the provision of educational facilities and opportunities for the learning and development of those

nursing skills which would enable the graduate nurse in this clinical area to function in positions of higher levels. Specifically, she should develop skill in supervising, managing, administering and teaching.

The educational program could also be extended in and to the undergraduate nursing schools and nursing service areas in hospitals and in public health. These programs could provide much of the same kinds of learning experiences as are presently being offered to graduate nurses only through the six weeks course at L.S.U. Such extension would mean that in the future the graduate nurses interested in premature nursing would not have to spend six weeks additional time supplementing the deficiencies of her basic education. It is important to realize that the characteristics inherent in the nature and structure of a course such as the six weeks course are in effect limitations to the development and advancement of premature infant nursing. Upon this analysis the plans and activities of the past year were based.

#### Premature Infant Nursing Course

Statistical data regarding the six weeks course are presented in tables number 8, 9, and 10. In October 1952, recommendations were submitted to the L.S.U. Department of Nursing Education and to the Premature Infant Committee, the purpose of which was to create a course which might better meet the needs of many nurses. The major objectives were (1) to establish a course which would provide learning experiences in the developments of nursing skills in supervision, management and teaching, (2) to structure the course so that it could be taken on a "part-time student" basis, thus making this opportunity more readily available to a greater number of graduate nurses. After much consideration and discussion it was decided that such a course would not be feasible at this time.

#### In-Service Education

Consideration and efforts were then shifted to developing other plans which would provide education to nurses in the nursing service area. In addition, it was apparent that such a program should provide some form of teaching for the non-professional nursing personnel. It was felt that the need for an educational program of this type was grave at Lafayette Charity Hospital and some preliminary steps were made in this direction. However, the plans failed to materialize because the primary preparatory plans in terms of building reconstruction and obtaining equipment could not be met.

\* All Hospital Nurses

Attention therefore was shifted to the development of an in-service education program in the center at Charity Hospital. In developing such a program, consideration had to be given to the fact that it could not be successful if in any way it increased the already heavy work load of the nursing staff. With this in view, a program was started in March 1953.

It was first necessary that a situation be created within the nursery so that the learning opportunities could be integrated with service. The new designation of the nurseries according to the type of service needed and the assignment of personnel permanently to one or another of these units provided such an opportunity. In addition, these changes were in the direction of bringing practice into line with theory and thus facilitated education at levels other than "in-service." At first, very little of the instructor's time was directed towards the teaching of premature infant nursing per se because of the difficulties encountered in obtaining the acceptance of and adjustment to these changes by the personnel. This was true despite the fact that much time had been spent with the group prior to making the change. The educative techniques and methods carried on in this program have been rather informal, varied, and flexible depending upon the situation. Some specific examples may illustrate the method: It was found desirable in view of the work load and lack of opportunity for formal classes to use techniques and methods probably more nearly related to supervision than they are to the process of teaching as ordinarily understood. Thus many of the functions and activities formerly designated to the supervisor were assumed by the Educational Director and used as teaching tools. A specific example is the preparation of the twenty-four hour nursing report. This report serves as a summary and therefore must contain all of the significant factors involving not only particular babies, their condition and needs, but, also, an overall evaluation of the existing situation within the unit. Preparation of this report provided the Educational Director with repeated opportunities for individual and group conferences and discussions in which evaluation and appraisal of infants as to their condition and needs were made and suggestions and recommendations for fulfilling these needs were brought out. For example, the transferring of a baby from Nsy. III to Nsy. II, might entail a discussion on the prenatal and delivery history of the baby, a clinical nursing appraisal of the baby's condition at birth and since birth, his present condition and needs and how they could be met.

Another phase of this program has been to help the head nurse staff develop and carry on the management and teaching of the non-professional nursing group. This factor as it is related to nursing has become increasingly more and more important in view of the shortage of graduate nurses. Our achievements in this area have been greatly limited due to the fact that in the first instance it requires a great deal more of the nurse's time to teach others than if she were to do the job herself. The discharge nursery situation illustrates this problem. Only one nurse is available for carrying on the nursing duties of Nursery I; in addition, she is responsible for parent-education, discharges, etc. It follows, therefore, that in Nursery I nearly all of the nursing care of these "graduate" babies is carried out by the attendant group. Thus these attendants are the only group in a position to observe and report on the condition and needs of these infants. It was then necessary to devise a form for recording this information; this form was placed on the bedside table of each infant so that as little additional time and effort as possible was necessary in the use of it. It was further planned that each day the Nursery I nurse would conduct rounds which would serve both as a medium of education to the attendant group and as a means of providing good nursing care supervision for the baby. However, the nurses' time is so limited that only a sporadic attempt along these lines has been possible; another graduate nurse for this unit seems essential if the goal of attendant education as well as proper patient supervision is to be attained. Similar situations and problems exist in the other three nurseries.

#### Undergraduate

For two years now the position of Assistant Supervisor in Charge of Teaching has not been filled. After the first year of vacancy it seemed necessary to formulate plans so that the teaching of the undergraduate student nurses could proceed in an orderly way in spite of this vacancy. Such a plan was reported in last year's annual report. After a year's trial and experimentation along these lines only one conclusion can be drawn—a plan which embodied the "team nursing concept" of teaching is not feasible without a team. The heavy work load of the head nurse group not only limited their participation but in most instances prevented it entirely. Therefore the burden of teaching these students was shouldered by the Assistant Supervisor in Charge of Nursing Service (7-3 shift) and, since the beginning of 1953, by the Educational Director. When the Assistant Supervisor in Charge of Nursing Service (7-3) was temporarily transferred to 3-11 shift because the need for supervision there at this time had become most urgent, the Educational Director was left with the sole responsibility for the undergraduate teaching. She felt that the undergraduate students were receiving neither enough nor good enough supervision of their practice to permit them to learn adequately all the various special nursing procedures and functions prior to their having to assume the responsibility for carrying them out. Thus the students' experiences were limited to those areas in the nursery where supervision could be provided by the Educational Director and where the need, quantitatively, for supervision was not as essential because the nursing procedures and functions were less complex. These changes and the reasons behind them gave rise to much misunderstanding and disagreement among other groups concerned with student education.

During the past year 125 students were assigned for a two-week experience in the premature nursery. Of this number 69 were Charity students and 56 were affiliates. It might be of some interest to point out that the above number of Charity students represent 66% of a total group of 106 students; whereas the affiliate students represent 14.8% of

\* See page ....., "Care to Babies."

382 students who affiliate for pediatrics. Of 22 affiliating schools only 4 schools assigned students to the premature nursery. Since the education of the undergraduate nurse student is very important for the future of this clinical nursing area, better integration into the basic program of study would seem advisable.

### Other Activities

There were some other activities that were carried on in overall program of premature infant nursing education. In March members of the nursing staff of the unit were asked to participate in a three-hour "Seminar on the Premature Infant" presented as part of the basic training program for Public Health Nurses in Louisiana. The Assistant Supervisor in Charge of Nursing Service (7-3), Medical Social Worker and the Educational Director participated.

In January, 1953, the Educational Director was invited to give a talk to the nurse staff of the U. S. Public Health Hospital in New Orleans.

Recently arrangements were made between the Educational Director and the Public Health Co-ordinator at Hotel Dieu to offer the undergraduate student nurses there a "field trip" to the Premature Nursery at Charity. To date two such experiences have been offered, and it is planned to make it a two hour session for all the students in the future.

### Parent Education

The following table shows the number of mothers of Charity Hospital born babies who were brought to the unit and interviewed by the social worker or discharge nurse. They received instructions in formula preparation and other advice as outlined in the report for 1951-52. The % of mothers seen would be higher had correction for multiple birth been made.

Month	Total Adm.	C. H. Born	C. H. Born Survivals	Mothers Seen	% C. H. Survival Mo. Seen

Respectfully submitted by

EDDIE V. COOKSEY, R.R.L.

**MEDICAL SOCIAL SERVICE DEPARTMENT****July 1, 1952 to June 30, 1953**

During the year, July 1952-1953, the Social Service Department helped 131,493 patients and their families. Of these, 59,919 were recorded cases and 71,574 were unrecorded. Even though no written record has been kept the patient and his family were given the service and this took time, sympathy and understanding. A total of 19,237 patients, their families, individuals responsible for the patients were helped to understand the patients' illness, its limitations and implications; in 16,187 cases the patients' illness, and his needs, were explained to interested social agencies. A total of 2,819 patients were helped to meet medical relief needs such as medication, appliances, transportation to attend clinic and overnight shelter while awaiting clinic attendance. The number of patients given service is small compared to the total number of patients treated in the clinics, wards, admitting and accident departments, but it is tremendous in relation to the number of social workers in the department.

Although the department is set up to have 31 social workers—25 medical social workers and six psychiatric social workers—there was an average of two vacancies in the medical social work staff and one in the psychiatric social work staff throughout the year while approximately two jobs were filled with part time workers. Therefore 27 workers were available during the year to give service to the 59,919 patients and 71,574 contacts. The workers were supervised by six supervisors, all of whom had other responsibilities as well, such as giving case work services to employees of the hospital, tying in the program of the two schools of social work within the department, reviewing the work of the nine Hospital Intake Interviewers who determine eligibility for free medical care. Furthermore when workers are sick or on annual leave the supervisors are responsible for the worker's service assignment. Besides the social workers and supervisors and the hospital intake interviewers to give service to the patients, clerical staff was needed. The 15 clerical workers included a driver for the station wagon, a bookkeeper, file clerks, receptionist, stenographers, typists, etc., plus three workers in the Cancer Follow-Up Program, making a total of 65.

In order to help the 131,493 patients it was necessary for the workers to spend 59½ % of their time interviewing patients, doctors, nurses, etc., 34½ % of their time recording, writing letters, telephoning social agencies, etc., and 6 % of their time in supervisory conferences.

The case load dropped 9,731 this year and the contacts dropped 11,778. This is explained partly by the fact that funds available from private sources for medical relief needs were curtailed and no count was kept of patients given insulin or medicine for patients with tuberculosis through the Tuberculosis Association Fund. In 1950-51 when these patients were counted statistically and when more funds were available for medical relief needs, more than 6,000 patients were helped. Furthermore in view of the pressure of work and the limited staff it is impossible to keep complete and accurate statistics.

Besides the fact that the number of workers was limited, there was also continuous turnover. There were 20 resignations in the professional staff during the year and 19 replacements compared to 18 resignations and 23 replacements last year. The reasons for resignations remained the same both years. The largest number, six, each year was the low salaries, for the increase in the minimum effective last year still did not bring our salaries to the level of the professional salaries in New Orleans or the rest of the country, while the next largest number, five, this year

and three last year was to return to school to complete the second year of professional training. Other reasons which included marriage, pregnancy and leaving New Orleans involved only one or two workers each year.

The turnover plus the large case load per worker made it difficult to give as much time to each patient as he needed or to participate in planning with the doctor for the patient's medical care to the degree that the doctor wished.

The patient needs Social Service because acute illness, prolonged illness, hospitalization and the after effects of illness are serious problems for anyone to face. The doctor needs Social Service because to treat the patient it is important to know about the patient's social, economic and family problems which may have contributed to his illness. Therefore the Social Service Department gives the doctor information about his patient which he needs to know in order to treat the patient and which he would secure himself on private patients. The Social Service Department also helps the patient to meet the problems related to his illness so that maximum benefit from treatment can be derived and maintained.

To help the patient meet the problem related to his illness many community resources must be used. A total of 2,798 patients were referred to public and private social agencies such as the Department of Public Welfare, Vocational Rehabilitation, Family Service Society, Children's Bureau, Crippled Children's Division of the State Department of Health, etc. A total of 375 children were referred for adoption, foster home care, or institutional placement; plans were made for the care of 741 chronically ill patients either in their own homes or in nursing homes. In this way the families of patients with tuberculosis received public assistance grants while the patient was hospitalized or unable to work; patients with treated tuberculosis, cancer, heart disease, or with other handicaps were retrained for jobs within their physical capacity; families were helped with marital problems so that they might get along together better and children were given a chance to grow up into normal, happy, contributing members of the community. A special agreement was worked out with Family Service Society so that mothers who have had a premature baby and who seem to be rejecting the baby or who seem to be unduly anxious about it will be referred to the Family Service Society for case work services over a long period, a service for which we are not able to assume responsibility at this time.

Lacks in community resources include:

- 1) Facilities for the custodial care of Negro feeble-minded children. Since the State has only a very limited number of beds available and as there are no private resources some of these children for whom there is no resource in the family group have to be cared for in the hospital indefinitely, sometimes for several years. There are two such children in the hospital now for whom no plans can be made.

- 2) Care for the chronically ill, including nursing home care, hospital care and home medical care service with both visiting physician and visiting nurse service available as well as a friendly visitors service which would provide volunteers to visit home bound patients. Many patients could be cared for at home and both they and their families would be happier and better satisfied having them home provided visiting physicians and nurses were able to go into the home to see the patients. In Louisiana a patient who has cancer in the terminal stage, is unable to pay for private medical care and who is sent home from the hospital, will probably never see a doctor again. Although there is no treatment that the doctor can offer there is a psychological effect on the patient to have a doctor come in and there is the comfort and reassurance to the family to have the doctor

available with whom to discuss the patient's distressing symptoms, his pain and dependency, all of the upsetting factors that go with illness. Few Negro patients with cancer can be placed because there are only a few beds available in nursing homes for such patients. These patients may have to be hospitalized for months until they die.

3) Convalescent care. It is important and imperative that patients recovering from operations, from fractures, from serious illness have a period of rest and restricted activity before resuming their job. Patients who live in rooming houses cannot get the care they need. Having such care available means that patients can be discharged from the hospital earlier. There is also the psychological benefit to the patient in getting away from the dependency-creating effect of the hospital.

4) Additional beds for the treatment of patients with tuberculosis and for patients who are mentally ill. Serious situations have resulted from this lack. The results can be far-reaching, often children in the family are affected.

5) Lack of resources for medication. This results in children and adults going without necessary medicine because there is no community provision for free medication other than the Sickles Fund. As its finances are limited only inexpensive drugs and only small amounts of these are available to residents of Orleans Parish.

In an attempt to meet the lack of resources for medical relief needs of patients including medicine, the hospital makes some funds available to the Social Service Department totaling \$1030 a month. Of these \$500 is designated for insulin, \$30 interest on the Weil Convalescent Fund, \$400 interest on the Stauffer-Eastwick Fund which is for white patients only, and \$100 a month, the Patients' Welfare Fund, which is part of the budget of the Social Service Department. Funds from private sources include Jesuit Social Service, Temple Sinai, the Pilot Club, the Hill Stores, the American Cancer Society, the Lions Club, and the Tuberculosis Association of New Orleans. The department does not handle the money from the Jesuit Social Service, the Lions Club or the Tuberculosis Association. The latter which is new amounts to \$2400 a year for medication for patients with tuberculosis who are under treatment in the clinic and is handled by the hospital pharmacy. The Pilot Club and Temple Sinai each contribute \$10 a month while the Hill Stores have been giving \$500 for the medical relief needs of orthopedic patients for several years. Of the expenditures for which the Social Service Department is responsible and this does not include the Insulin Fund which is handled by the pharmacy, \$4751.38 was spent for medicine for 2104 patients, \$2111.91 for appliances for 257 patients, \$895.03 for maintenance for 125 patients while attending the clinic, having tests made or until they got their first pay check, \$888.92 for transportation for 333 patients, making a total of \$8647.14 for 2819 patients. This is \$2404.19 less than was spent last year. Approximately \$1400 less was contributed by private sources this year and the remaining \$1000 approximately was a drop in the use of hospital funds mainly due to the fact that the Insulin Fund was not included this year but it had been included for three months of last year. The \$1400 drop in private funds is due to the fact that the donor of the Christ Church Cathedral Funds could not continue to give. This has proved true eventually of all private sources of funds; the individual has finally decided that the need is too great for private resources and that the hospital should assume this responsibility. Sixty-nine per cent of the money available this year was spent for medication while 47% was spent for medication last year. A total of 509 fewer patients were helped this year but that is considered to be due to factors mentioned previously. Although the Department of Public Welfare can include medication for its clients

within certain limitations there are many families in which the wage-earner's income is not sufficient to cover the cost of necessary medicines; there are other patients on pensions, etc., who cannot pay for, their own drugs and even for those receiving public assistance there is an interim period during which the grant is being increased and during which our funds are used to provide medicine.

With the consent of the hospital administration the use of the funds available has been restricted to certain drugs and diagnoses in order to conserve them as much as possible. As it is not feasible with the staff available to try to get statistics on the number of patients for whom no drugs can be secured we have no idea of the potential need. Since so many diagnoses can now be treated on an out-patient basis the need for funds for medication may be expected to increase.

Besides our major function of case work services to patients the department is responsible for participation in the teaching of school of social work students, medical students, and students in the schools of nursing, physical therapy, dietetics, practical nursing and in the LSU Department of Nursing Education. A total of 35 students from LSU and Tulane schools of social work had field work placements in Social Service during the year: 12 in medical social work and 23 in psychiatric social work. All were supervised by field work instructors from the two schools. Because of insufficient staff it was not possible for the department to assume responsibility for the supervision of any students this year. Service was given to 1238 patients by the students.

Besides the formal teaching of the professional groups connected with the hospital there was of course continuous informal teaching relationships with all personnel. On psychiatry, for example, the Psychiatric Social Service Unit took part in the orientation of new residents. This is an area in which much more could be done provided staff were available for the medical staff especially is interested in developing better team relationships between the two disciplines.

The nine hospital intake interviewers who determine eligibility for free medical care in the accident department, wards and clinics, interviewed 25,913 patients or approximately 12% of the total number of patients treated. Of these 6776 patients or 26% were ineligible for free treatment. Although the number of patients interviewed has varied, the percentage of ineligibles has remained constant for the past three years. The largest number of ineligible patients based on the number interviewed was in the clinics, 49%, while 25% ineligible patients were in the accident department and 13% in the wards. The largest number of patients interviewed was in the accident department. In view of the fact that the hospital maintains the major emergency service in the city an attempt is made to interview every patient seen over approximately a 24-hour period. However, because of the volume of patients and limited staff only about one-fourth of the patients are screened. A total of 2785 patients seen in the accident department were referred to private doctors. Since 1942 when the hospital assumed responsibility for determining eligibility for free medical care it has been understood that the program is an attempt to screen only and that to try to review all patients applying for treatment would require a very much larger staff. Even with the present staff there are so many complicated situations that a full time supervisor for the unit is badly needed.

The Cancer Follow-Up Program established and sponsored by the American Cancer Society and the State Department of Health in 1947 was discontinued in June 1953 and reorganized as a tumor registry. As the program was to be entirely medical it was no longer supervised by the Social Service Department after 7/1/53. This reduced the total number

of employees in the department to 62. At the end of May 1953 there was a total of 12,319 patients in the follow-up files. Of these 3207 were dead and 1665 had pre-cancerous lesions; 7447 had proven cancer and were alive. During the eleven months period in an attempt to keep these patients reporting regularly for observation and treatment 2986 letters were sent to the Department of Health, Department of Public Welfare, Cancer Society and the patients themselves; 2715 telephone calls were made.

Respectfully submitted,

LOUISE MEYER

Director

Medical Social Service Department

## MEDICAL AND PATIENTS LIBRARY

July 1, 1952 to June 30, 1953

### Staff

As in previous years, volunteer workers have been very helpful in assisting the full time library staff. These volunteers worked a total of 158 hours during 1952-1953.

### Reading Room Activities

Attendance in the reading room by the doctors and professional staff of the hospital continues very high. The relaxing atmosphere of the reading room, and the ready availability of reference books, professional and popular periodicals, and carefully selected fiction and non fiction make the Library a real contribution to the hospital community.

### Ward Activities

A frequent and thorough schedule of book truck visits to the wards continues to be a real factor in maintaining in-patient morale. Personal comments and notes of appreciation, but primarily the large number of books circulated, testify to the patients' appreciation of the library service.

### Statistics

## VOLUNTEER SERVICE

July 1, 1952 to June 30, 1953

To coordinate and increase the contributions of volunteer effort throughout the hospital has continued to be our aim during the 1952-53 fiscal year. There has been considerable growth over last year with some 1,867 individual volunteers working 50,284 hours in over 41 different sections as follows:

Admitting Room (Receptionists and Supply Aides)	3,511
Blood Bank (Supply Aides)	1,481
Blood Donor Station (Receptionists and Supply Aides)	3,425
Brain Wave Station (Research Aides)	114
Cancer Registry (Typing and Filing)	187
Central Service (Messengers and Supply Aides)	5,983
Guild Room	1,202
Reclaimed Gauze	9,338
Chest X-Ray (Receptionists and Messengers)	958
Dibert (Personal Shoppers and Piano Teacher)	177
Dietary (Clinic and Formula Room)	526
Entertainment (Auditorium and Wards)	1,376
Heart Station (Office work)	40
Housekeeping (Linen Room)	241
Library (Book Cart Attendants)	158
Nurses Aides (Delivery Room and Wards)	2,289
Neuropsychiatry (Recreation and Ward Assistants)	30
Orthopedics (Recreation and Friendly Visiting)	199
Observation (Ward Assistants)	528
Obstetrics (Ward Clerk's Office and Nursery)	1,731
Layette Room	2,217
Pathology (Supply Aides)	197
Pediatrics (Feeders)	2,524
Play Program (Recreation)	4,104
School Room (Repair Books)	23
Pharmacy (Supply Aides)	687
Polio (Physical Therapy)	69
Recreation (Rides and Visiting)	182
Post Office (Filing)	39
Radiology (Recreation and Ward Assistants)	507
Record Library (Messengers)	409
Recovery (Ward Assistants)	794
School of Practical Nursing (Office Work)	132
Social Service (Receptionists and Case Aides)	1,673
Neuropsychiatric Social Service (Aides)	321
Surgery (Ward Assistants)	1,264
Telephone (Messengers)	93
Visiting (Individual Work)	155
White and Colored TB (Play Program)	75
Miscellaneous	1,325

REGISTRATION—881 individual volunteers were interviewed and assigned.

TRAINING—14 Orientation Classes and hospital tours were arranged with an attendance of 257.

PUBLICITY—558 radio spot announcements and 3 special scripts were written for recruitment and 12 newspaper stories were arranged.

**RECOGNITION**—Awards in the form of Emblems, Pins, Bars and Certificates were presented to 282 volunteers. Over 800 Christmas Greeting Thank-You cards were mailed. A successful Annual Meeting was held in October with a good attendance of volunteers and staff.

**ADVISORY COMMITTEE**—Members included representation from key community organizations, hospital staff and volunteers.

Mrs. Asahel W. Cooper, Jr., Chairman  
 Mrs. Crawford Davidson, Vice Chairman

 Mrs. Scott Wilson

### Organizational Projects

**ALPHA BETA SIGMA** High School Sorority continued to serve the Blood Bank regularly on alternate Saturday mornings with 27 girls participating.

**AMERICAN WOMEN'S VOLUNTARY SERVICE** continued the Layette project on the tenth floor and the Cheerlady group who come regularly to the Radium Wards. An additional Cheerlady project was started visiting the Orthopedic Wards weekly. The Entertainment project provides excellent shows in the Auditorium and frequently, on request, in various sections of the hospital.

**AMERICAN RED CROSS, NEW ORLEANS CHAPTER**, assigned 31 Nurses Aides. This included a night group of 9 who received their practice training on the fourth floor. Four Staff Aides and 23 Juniors were assigned in various departments and members of the Career Group Motor Corps provided Sunday afternoon rides for Polio patients. Motor Corps Drivers also served by bringing patients to clinics and delivering supplies.

**COMMUNITY VOLUNTEER SERVICE** referred 111 new volunteers including 12 members of the JUNIOR LEAGUE. Nine outstanding workers were invited to the community wide Recognition Supper in March and received over 100 honor certificates for Charity Volunteers. Several shots of volunteers at work in Pediatrics were included in the TV show.

**GIRL SCOUTS** sent over 977 girls to work in the Reclaimed Gauze Room on Saturday mornings. Many Senior Scouts helped as individual volunteers in Central Service, Pediatrics Feeding and the Nursery.

**NATIONAL COUNCIL OF JEWISH WOMEN, NEW ORLEANS SECTION**, has continued to provide a paid director and equipment for a Pediatrics Recreation Program to which we referred 121 volunteers.

RAINBOW GIRLS work regularly in the Blood Donor Station with 25 members participating.

**DONATIONS**—Many contributions from groups and individuals are channeled through the Volunteer Office. Some of the outstanding gifts received included:

American Red Cross—Regular Supply of Slippers (for 10th floor)  
American Women's Voluntary Services—Layettes, Christmas gifts,  
Piano  
Mr. Whitney Bouden—Muzak with 8 loud speakers (for 3rd floor)  
Carrollton Lion's Club—Christmas Party, Gifts (for Polio)  
Christ Church Young People—Visiting, Refreshments, Gifts  
Delgado Trade School—Building Dining Room Furniture (for 3rd  
floor)  
Delta Women's Club—Viewmasters, Reels (for Radium Wards)  
Girl Scout Troops—Holiday favors, small gifts  
Junior Red Cross—Special parties, birthday and holiday favors  
Musician's Union—Professional bands for special occasions  
New Orleans Garden Society—Potted Plants (for 3rd floor)  
Palm Air Garden Club—Piano Tuning  
Presbyterian Church Circles—Individual Adult Christmas Gifts  
Tack Amusement Co.—Juke Box (for 3rd floor)  
Temple Sinai Sisterhood—Premature clothes, Gauze Packs, Prizes,  
Stuffed Toys  
WTIX—Classical Records  
WWL—Christmas Toys for Tots

Respectfully submitted,

FLORENCE JENNINGS  
Coordinator of Volunteers

## PEDIATRIC RECREATIONAL PROGRAM

## DONATIONS BY MEMBERS OF THE GUILD AND OUTSIDE ORGANIZATIONS

July 1, 1952 to June 30, 1953

Thirty complete hand made layettes, large amount of used clothing, new and used shoes.

Books and magazines, scrap books, picture puzzles, games, and toys.

At Christmas, four-hundred dolls were donated and given to the children. Mrs. Walter Grunning, Chairman of this Committee, gave a Christmas party for the children on the ninth floor, the Contagious and the Polio Units; all the children received dolls and toys. Ice cream, cake, and candy were served to all.

Two parties, one at Christmas and one at Easter with gifts, entertainment and refreshments were given to the John Dibert Tubercular patients by the Magnolia Branch of the Louisiana Sunshine Society of which Mrs. Joseph E. Snakenberg is the President.

This Society also gives four pounds of coffee weekly to the Dibert and to the Breaux Buildings; the coffee fund is under the direction of Mrs. Charles Richard.

The entertainments, gifts, and refreshments were deeply appreciated and enjoyed by all.

Names of Groups Assisting in Guild Work:

American Red Cross Chapters of New Orleans and Jefferson Parishes;  
Magnolia Branch of the Louisiana Sunshine Society;

St. Margaret's Daughters;

St. Louis Cathedral Center;

Grace Episcopal Church Auxiliary;

Our appreciation and thanks are extended to one and all for helping to make this past year of the Guild such a wonderful successful one.

Respectfully submitted,

Hon. Pres., Mrs. C. Warren Gilmer  
Nellie Boudreaux.

**CLASSES FOR HOSPITALIZED CHILDREN****Sponsored by: Orleans Parish School Board****July 1, 1952 to June 30, 1953**

Thirty years ago the first class for convalescent children in the Charity Hospital, was established in the Milliken Memorial Building. On September 28, 1923, the Orleans Parish School Board appointed a teacher, in compliance with the request of the Medical Committee of the Board of Administrators of the hospital, to offer instruction to hospitalized children deprived of the advantages of school. Subsequently, four additional classes have been established to meet the growing need of providing educational advantages to patients located in different areas on the hospital unit. For each of the five classes now in operation, the Orleans Parish School Board provides professional teaching services, books and teaching equipment while building facilities and maintenance are provided by the Charity Hospital.

**CLASS FOR CONVALESCENTS (W. 900)****Instructor: Selma K. Fasting, M.A.**
